

Q1 support/ opposition	Q1A reasons for support or opposition	Q2 special memories	Q3 Suggestions for the detailed design
No Answer	It looks practical, retains some of the historical aspect of the old jetty and caters for various groups	No answer	No answer
No Answer	I want to maintain construction because of the history and marine life	Many of my grandfather fishing on the jetty	Just try to copy the original construction
No Answer	It covers all bases of both historic and modern		
No Answer	We need to keep more timber	Esperance being great	Try to keep the original
Strongly support			
Strongly support	It incorporates lots of my values and I believe it allows me to do my favourite recreational activities (fishing and diving) with ease!	Sammy the Seal aswell as the donation box upon entry like the old jetty	I believe regarding diving the design is adequate enough. Regarding fishing I believe a few safety signs, fish cleaning benches and measurement guides
Strongly support	The concept of the jetty looks really cool. I've seen the concepts before and I still enjoy the idea of them now. The part that's dedicated to looking like and paying homage to the old jetty would really make it much more special. Not to mention all of the redesigned features it has from the old jetty. There really isn't a reason to dislike the new jetty. With the old jetty, there are several locals that had relatives who helped build it, and with the new jetty, a whole new generation will be able to experience the same, and have their tales remembered for years to come. The jetty holds a special place in many of our hearts and I for one can't wait to see what the new jetty will be capable of; what amount of memories it could be responsible for creating. Thank you all at the Shire for continuing to make this town a better place.	I mainly remember having loads of fun with my family jumping off of the diving platform on the lower section of the old jetty. It's really great to see with the new design that other people will be able to experience the same memories that I have.	Something that I don't believe was on the concepts and an idea I'd like to pitch is to have built-in fishing rod holders so people can take easy breaks while fishing and not have to hold onto their rods the whole time.
Strongly support			
Strongly support	its cool	the big signs with all the different types of fish on it	
Strongly support	I think it will suit the esperance vibe. and has good access to fishing	Sammy the seal, make a memorial for him	have hoses on the jetty to wash your fishing buckets and fish off
Strongly support	i love it and think is will suit esperance and attract more tourists	sammy the seal	have fishinh rod holders
Strongly support			Build a platform at the water level or close to, that allows for fisherman to land large fish that otherwise wouldnt be able to be landed with the current height of the jetty
Strongly support	great tourist attraction for esperance		
Strongly support			
Strongly support	I am happy to support you on this project!!		place a water slide so people can have some fun and place some water balloons in too!!
Strongly support	I really like the idea and I also really do want a jetty	I just enjoyed walking along it with my family	
Strongly support	i love the idea that there is different sections to the jetty.		
Strongly support			
Strongly support	Good, practicle design	Sammy the seal statue, fish cleaning station. food vans	Water slide, shark swimming net, fish cleaning station, big diving platform, place boats can tie up
Strongly support	because it is old and dangerous and would be easier to build a new one	Fishing off it with my family	Accomodate fishing and diving and i think it should be easy to swim around
Strongly support	As being one of the many youths in Esperance the jetty has always been a part of my childhood along with being a historical landmark and attraction. Installing a replacement jetty would be sensational as the old jetty was known where the community of Esperance would be together making memories and enjoying what our town has to offer	To ensure that all people can access the jetty, being mindful of those bound to disability like wheelchairs, etc	

Strongly support		i remember the Sammy the seal and going squid fishing at night.and i also remember when i lost my shoe of the side of the jetty and it was really funny watching it float away	keep some of the old parts of the old jetty have good fish cleaning parts and have safety things incase of any accidents
Strongly support	because i feel the jetty is an important part of esperance.	my dad and my family would go fishing of the jetty on the weekends.	make it a big tourist attraction
Strongly support	Something needs to be done with the jetty, these plans will make the jetty easily accessible to all people, Whilst still keeping the original integrity of the jetty.		
Strongly support		Sammy the Seal	Kid friendly and fun for family and friends
Strongly support		have a fishing bench	spots for fishers
Strongly support		yes	
Strongly support	it looks cool		wheelchair stuff
Strongly support	I believe it promotes great heritage values and will compliment the refurbished foreshore nicely. The design incorporates the traditional look of the original jetty while adding many modern features. I believe it will be a great asset to the community.	Loved a cold winters night strolling down the jetty with you hot chips from Beryls Eats!	Try and make it as accessible to as many people as you can.
Strongly support	Because the town wants a Jetty and this is the only realistic solution.		Make one that doesn't fall down.
Strongly support			
Strongly support	I just want a jetty this looks good		
Strongly support	Because I like it		
Strongly support	I'm sick of not having a jetty and anything is better than nothing.	New to the town though as my husband and I will be starting a family in the not so distant future please ensure it is as child friendly as can be and enjoyed by all age groups.	Maybe have like a walking lane or cycle lane and fishing pods or something.
Strongly support	It's useable, great and something needs to get there, carry on has gone on for too long now!	The odd fishing off it. Was too scared to go on it mostly, the cracks were to big for my liking in it	Maybe the rails with the fishing part of it but safety comes first so nothing
Strongly support	The new concept seems to have pleased most people. I like all the different ideas that have been incorporated to one design. Great work!		Shade for fishing and a few benches along the jetty
Strongly support	It looks cool	Fishing	No answer
Strongly support	It is sensible. The current jetty is not salvageable and it would not be cost effective to attempt restoration. This Concept Design encorporates a heritage feel that recognises the importance of the Tanker Jetty in Esperance's history while catering to the public's needs, wants and finances.	No.	I trust The Shire.
Strongly support	It looks great , affordable, durable no point trying to fix the other one it's falling into bits and reached its life		Jumping ropes
Strongly support	to get this over and done with. :)		
Strongly support	Think that it looks like a good structure and design	Not really just remember the fishing side of it	A drop down jetty closer to the ocean similar to what the Busselton one has
Strongly support			
Strongly support	It's fantastic and incorporates an amazing recreational jetty, whilst also maintaining historical significance.	Having scuba and free dived the jetty on many occasions. It's the amazing marine life below the deck.	A focus on recreational activities. Great diving facilities a must have! And fishing rod holders. And feature lighting.
Strongly support	Gets family out and will be a tourist attraction	Catching squid. Being the voice for the sammy the seal donation box.	Artificial reef at the end od the jetty.
Strongly support	Beacuse it looks awesome and I'm Tired of this discussion		
Strongly support	Looks great. Will be functional and it's components suggest longevity.	The old wash down/fish clean station at the start.	Safety for children for me would be the biggest priority.
Strongly support	The existing jetty is expired. If any public jetty is to exist in this location then a new jetty must be built. The concept designs are for a new jetty, thus fulfilling the aforementioned criteria.	No	None. Concepts are adequate.
Strongly support			

Strongly support			
Strongly support	Design looks very good. It tells the history of the old jetty, and gives us a great new one to use that will last.	Just diving and fishing off the jetty	Try to make it as long as the current jetty please. And keep the widened bit at the end, that's really good.
Strongly support	I feel it is a good representation of what the community wants. H+H Architects have taken the design brief and given us what we have asked for.		
Strongly support			
Strongly support	good to see something new in esperance. better then keeping everything old and the same		wash down spots on jetty. a better handrail.design so your not always rrying to fish in between bars or sitting in the outside of them
Strongly support	Covers a lot of activities with the different sectors		
Strongly support			
Strongly support	Looks like a great option to me!		
Strongly support	Its proactive.	No	Fishing swimming walking biking fishing and fishing
Strongly support	Good balance of the old and what is feasible	I think current proposal is sufficient	Could possibly do something with local school students signing the concrete similar to what was done with Perth bell tower
Strongly support	Maintains a decent lenth of 400m plus good section layouts		
Strongly support	Just make it happen		
Strongly support	I think the concept is well designed and the ongoing maintenance will be minimal for the future		
Strongly support			Possible rock/Cement pool at headland to allow for parents to take young kids
Strongly support		Fishing as a teenager	Fishing
Strongly support	Love the way the design pays tribute to the original Tanker Jetty.	Fishing in the rain, through the night into the silly hours of morning as a kid...	A few strategically placed FAD's underneath along the length would enhance both fishing and diving.
Strongly support	Looks great		
Strongly support	Because we need a new jetty.	No	An ocean pool.
Strongly support	We just need a jetty already this is beyond the joke	I took my now wife on our first date there!	Shark cages like streaky bay and smoky. For you that dont know what I mean, they are let's say 20x15m steel cage about 2 foot out of the water and go to the bottom about half way along the jetty
Strongly support	I believe that it captures the best parts of the heritage of the tanker jetty, while being a cost effective solution for the recreational needs for both locals and tourists.	My main memories of the tanker jetty revolve around my recreational activities while growing up in Esperance. The main activities I used the jetty for where fishing and sailing	I think the concept intergrates everything that is required for the activities nicely. If anything it would be great to have multiple lower platforms for diving, swimming & fishing. But I think if it will come down to the budget, one will have to do.
Strongly support	Captures the heritage of the jetty while also showing a modern and contemporary style complementing the new foreshore	Fishing with family on the old jetty but looking forward to fishing with my own kids on the new one.	The current concept I feel had the appropriate facilities for diving and fishing such as the diving platform. For the more involved details I would like the shire to talk to current fishing and diving groups to ensure their requirements are met as best as can be.
Strongly support	I think it's simplistic and represent the historical values of the current jetty		

Strongly support			
Strongly support	It looks great and we need to get the ball rolling for a new jetty		
Strongly support	Would love to move on a a have a new jetty to use.		
Strongly support	Because it honours the old and moved forward with the new		
Strongly support	It's simmlar to the existing structure and yet has modern elements which will ensure it meets the needs of our community and tourists well into the future.	No, I think the node ideas already presented are all fantastic.	The platform is great. As someone who got their PADI (scuba licence) from the platform of the old jetty, I think it's great to have this reinstated.
Strongly support	The design has the main features needed for a new jetty. It will serve its purpose to locals and visitors.	No	Lots of benches so people can stop along the way and admire the view or do some fishing. Fish cleaning area like old jetty.
Strongly support	The design is sympathetic to the existing structure yet includes modern improvements which will future proof the structure for both the community and tourists.	The nodes already proposed sound great!	I think the five platform is vital. As someone who received their PADI (scuba licence) from the dive platform of the old jetty, I'm pleased to see this reinstated in the new design.
Strongly support	Multi-functional and similar to what we have now. It seems the community of Esperance are not open to change so keeping it simple and similar to what they know is key to success	Just an enjoyment of walking it.	
Strongly support			
Strongly support			
Strongly support		Nil	Nil
Strongly support			Maybe some shade/cover from the sun
Strongly support	The current jetty is dangerous and I find the design replacement is a great compromise.	Walking out and watching "sammy the seal"	
Strongly support		Just more Safety rails I was always worried about falling off as a child.	keep the fish cleaning bench. That was always handy
Strongly support	I think all the proposed features will service the whole community!	I think they have thought of most things already	
Strongly support	Everytime we play near it or drive past the jetty my 8 yr old son gets tears in his eyes because he thinks the jetty looks so sad and lonely. This design looks family friend and age friendly for young people and older people and also tells a story about the old jetty.		
Strongly support	I like that it's simple and keeping it similar to what we had prior		Accomodate plenty of space for fishing.
Strongly support	I feel we desperately need a jetty!	Nope	
Strongly support	Its looks great, practical, user friendly.		As long as its easy to access and use for elderly with walkers, wheelchairs and also parents with prams.
Strongly support			
Strongly support			Safe and user friendly for families with young children
Strongly support	It appears to be multifunctional and appealing to wide audience	No only lived in esperance 10 years and jetty been closed for a number of those	Yes to diving and fishing... walking along... being able to walk along a jetty shorter or otherwise is a lovely feeling
Strongly support			
Strongly support	Because out of anybody in Esperance, you will know what would work best for the budget, and community. I'll like to think you have rate paying locals in mind. And would not put an overpriced silly idea in front of the whole town. I support your idea and believe you thought through everything twice. Love the plans, And just fully love the idea of having a jetty back in Esperance. Go for it 🖱	Just fishing and diving	Long enough for the artificial reef. But no push
Strongly support		No, I didn't grow up in esperance.	I'd prefer if it stays open for free for the public. Apart from that I'm happy with the proposed design

Strongly support		I think they have all been covered in the new concept drawings	I feel if it is made to the concept drawings supplied it will look great. Longest length possible will be best with the budget in mind
Strongly support	It looks good and its time to build one for our grandkids		I think the Dive Platform needs to move to the end of the Jetty The Historic section should have old timber put on the outside to show the aged look next to the new timber
Strongly support	Supports heritage values, great length and great for fishers		An enclosed swimming pool like all the towns in South Australia have off their jetties. Make it multipurpose instead of just for fishing
Strongly support		No	Lighting,
Strongly support			
Strongly support	Respects the heritage of the original.		End of jetty should give potential for an underwater observatory. This will add to the tourism draw of the jetty.
Strongly support	It represents what is needed for the jetty		
Strongly support		No	
Strongly support	Want a jetty that can be used ASAP	Na	Allow for a variety of activities. Allow for future development
Strongly support	I am very happy with the way it looks and cant wait to use the jetty again		I think they have covered most bases
Strongly support		NO.	No.
Strongly support		Fishing and casual walks. Spotting dolphins.	If it's not prohibitively expensive, more lower platforms for fishing would be good. I've lost a few good squid due to the height above water...
Strongly support		No.	Lighting, rod racks
Strongly support			
Strongly support	Well, it has everything you could ask for! And the construction looks like it will be easy to maintain.	I loved fishing off it. I also loved walking all the way to the end and taking a lot of photographs. And sometimes just sitting back in a deck chair and catching a few rays of sunshine. There was one time that myself and my daughter went fishing right off the end and a blinding rain storm rolled in. Plus harsh side winds! I almost went over. Great times! My Dad and I had our picture taken by your local magazine/paper at the time, around 1994?	Add a fish cleaning station with pumped sea water and bright lighting for the station. Plus a Sammy the Seal mural or statue in the water. I loved feeding that seal when he/she was alive!
Strongly support	It looks great!	Nope, Just want a jetty.	Good lighting, a design that will last and facilities like a fish cleaning area and rod holders.
Strongly support	Great compromise		
Strongly support	We just want a jetty back, before our kids are too old. I want a brand new jetty not a refurbished one.	Photos of people walking under it	The fish cleaning table with wash down was awesome.
Strongly support		A lot of great memories growing up fishing and diving from jetty.	Dont increase rates to accomodate jetty
Strongly support			
Strongly support	I really just want a jetty back to take my young children fishing off		
Strongly support	Esperance overdue for a replacement jetty	Fishing with family	Lower levels for access

Strongly support	3 years with out one just need to see a new one It's a similar size to old one Modern day materials If it's cost effective let's get it built	School Holiday Fishing and Squidding	Good cleaning facilities Maybe some wind breaks at cleaning area and along the Jetty for families to shelter from summer se breeze
Strongly support	It looks good and it is time this whole saga is put to bed	No	
Strongly support	Appears to retain some of heritage value and is substantial in size and allows for further expansion	Fishing	I think it appears to cater for this
Strongly support	Versatile for numerous activities	Jetty meeting the sand. Not small ramp	Lights for night fishing. Ladders along side every 30 / 40 meters so you can jump in and rescue kids if they fall in. Not have to swim to end or beach
Strongly support			
Strongly support			
Strongly support	Great steps forward and retains its historical looks	The wide section at the end and the awesome diving	Wind breaks/shelters definitely at the end for fishing and a fully enclosed shark proof swimming cage for summer time. Lets ,make it a jetty for everyone!
Strongly support			
Strongly support			Fish cleaning station, as the originak had, a necessity.
Strongly support	Time for Esperance to have a change		Easy to use and functional Design keeps some elements of the old jetty
Strongly support			
Strongly support	A lot of thought has gone into the design, looks great!	Love walking along the jetty watching the sun set and catching squid!	Would love to see a restaurant at the end of the jetty or a cafe.
Strongly support	I think they incorporate the history of the old tanker jetty whilst considering the future users of the new jetty		I think it needs the balustrades on both sides to ensure safety of small children
Strongly support	It's time to move forward. The new design respects and honours the past while providing a modern structure that compliments the towns wants and needs. Great job to the shire and the architects. Nailed it!	I think the memories I have are captured in the design that has been put forward.	Think you have it.
Strongly support	I would like to get the process of having a new jetty going as soon as possible. The current situation is an eyesore and embarrassment. Let's move forward.	Only fishing/squidding and Sammy the seal which I'm sure you've covered	Have a fishing table/bench like the last one had/somewhere to clean and scale fish that are caught. A tap and hose. Even if it's not on the jetty but somewhere close by the entrance to jetty so that tourists don't have far to go.
Strongly support	It looks similar to the old jetty, great for fishing and water sports	The casual ambience for fishing and peaceful walking	Fishing, Walking; washing bay
Strongly support	The designs look great, suits a wide range of users and is a positive step forward for the community.	Sammy, fishing, Australia day swim	I like the current proposal. Good lighting, seating, dive platform looks great as well as the platform at the end. Shelter at the end of jetty.
Strongly support	As lovely as our old jetty was she is old and certainly needs updating !! We are losing many tourists without our icon . It is time to move to the future with a new modern jetty 😊👍😊👍	I have many memories from the Tanker Jetty from been pushed off it from "Toss The Boss" raising money for Give me 5 for kids, to riding bikes off the end as teenager. To fishing, wedding photos and many lovely walks	Yes Diving And Fishing And maybe a section with glass maybe to see under the jetty
Strongly support	It says everything it needs to about the town and respects the heritage of the old jetty.	Just fishing and eating fish and chips or Beryls eats on beautiful evenings.	Lower decks along the side to accommodate divers and those who get 'snagged' when fishing.

Strongly support	It covers the different desires/needs of the community the design compliments the heritage of the old tanker jetty	long walks and family fishing	the use of the timbers from the old jetty to do such things as signage and bench seating
Strongly support			
Strongly support	Incorporates history fishing diving swimming with a nod to the original design and timbers now that they are past their structural life. Great compromise.	I do not.	Safe access for families with young children. Ensure safety first. The original jetty scared me that there were no railings. I wouldn't let my little ones near it even though I would have loved to experience it with them.
Strongly support	The concept design for the Replacement Jetty incorporates a number of features that would cater to many people such as the fishing station, historical section and dive platform. I like that it will take on the same curved footprint of the old jetty and that it will be longer than the previously proposed length.	We would always see people fishing off the jetty, legs dangling from the edge. It was always nice to go past and see what they were catching.	While ensuring the jetty looks new, at the same time some wood or wood-look rails and sleepers may make the jetty look as it once did. Incorporate old and new.
Strongly support	It is the perfect combination of honouring our old beloved jetty and giving the community a new jetty to heal and move on; the first impression of "heritage" followed by a functional fishing jetty and dive platform is broad enough in appeal to cover most bases. And importantly, it doesn't increase my rates :-)	Sammy the seal	rod holders shade seats a mini train :-)
Strongly support	let's get something we can use asap!		
Strongly support	All things come to an end. The original jetty has far exceeded its intended life span - let's celebrate that achievement but move on. Congratulations and thanks to all involved in getting to this point in tough circumstances	No answer	Accessibility for all. Diving and fishing activities
Strongly support	Perfect combination of things important to the Esperance community (heritage, recreational, cost)	Sammy the seal	Rod holders. Seats. Shade. Fish and chip van
Strongly support	I think we need to get on with it and it's a good design	No	Long enough
Strongly support	Looks good	Family picnics along the jetty whilst fishing	Please make it same size (length) as old one as it was a good walk
Strongly support	The jetty length being longer than proposed previously. The style looks to be keeping with the style of the original jetty. The wider area at the end of the jetty. The inlaid railway lines. Including wooden elements.		
Strongly support	I would like to see people visit and use the new jetty again.		
Strongly support			Keep it simple. A traditional style jetty, like what is already there, incorporating as many existing materials as possible. Nothing fancy. Perhaps some sheltered seating.
Strongly support	It seems to have covered all views of the Esperance community, including those who haven't been as vocal. My son(9) was also looking through the concept design with me and was very enthusiastic about the fishing and diving platform	No. other than using the jetty for fishing and walking along.	I am impressed with the concept design as is
Strongly support	I love the look of the concept drawings for the jetty. I think that it is going to suit all those that visit Esperance and for locals as well	I have fond memories of fishing off the Esperance jetty and I think that the design is covered well in the drawn up plans	seating along the jetty, lights and also made safe and accessible for people in wheelchairs etc
Strongly support	The design will fit into the foreshore redevelopment and is just what the community needs		I already think the dive platform is a great idea
Strongly support	I like the way it incorporates so many elements - the timber part and multiple interpretive spots; dedicated fishing spot; thoughtful design for divers and best of all, the wider section at the end making turning around with prams, bikes, wheelchairs possible and spot to sit and contemplate. Great design!	Being able to scoot about under the jetty... so much fun when kids were little, definitely the sealion/s.	
Strongly support	It has embraced everything that the town has asked for. Simple, with a nice combination of new whilst recognising the history of the old jetty.	History of Sammy the seal	
Strongly support			
Strongly support	The old girl is dead, want a new jetty and the plan looks great 🐾		Try to incorporate parts salvaged from the old so she lives on in the new

Strongly support	I think it is a great design and will be functional and well used by the local and visitors alike. Please hurry and get it built and eff the nay sayers. I'm over it.		Some see through glass or whatever to be able to see under the water off the five platform
Strongly support	This is a great design and very similar to the one we had which will please a lot of people	Just that families are able to gather together and enjoy fishing just like I did as a kid	Just don't put arched bars over the top..otherwise everyone will get pooped on by seagulls
Strongly support	It looks fantastic and we just need to move forward		
Strongly support			
Strongly support	It is designed for longevity and reflects the design of the old. It will support the activities missed due demise of the old jetty.		Regular ladders down it's length, a fish-cleaning area, regular seating, good lighting
Strongly support	Esperance needs a jetty!	Amazing family time ... 4 generations fishing on our jetty!	The history of the jetty, accessibility for everyone!
Strongly support	I like that it encompasses the old and the new, that it is user friendly and it isn't ultra modern so it will not "date" I think it's a great solution.		Bike racks, lots of kids ride their bikes down to fish. Some shaded/sheltered area for sun safety. Boat mooring area at the end to allow small recreational craft to be tied up and allow divers/swimmers/spectators the option to hop of the small water craft. Use the end of the jetty as an optional cruise boat tender area.
Strongly support	Although I am a supporter of the existing jetty, I do feel it is not able to be saved. The concept design honours "the old girl" while providing Esperance with a replacement that seems functional to requirements and should be less of a maintenance burden into the future. My only dislike to the concept is that the "fishing" section should be longer to better replicate the original.	Not really, as they are personal to me not general memories. At 13 I swam around the jetty as part of "Save the Jetty" Day. This swim followed a 5km run with SE Runners that finished at the Jetty. It was a great day where many community groups got together to fundraise. I remember crossing into "the dark' water and panicked bit so I rolled over and did most of the way up in backstroke. Once I rounded the end to head for shore I did more freestyle. When I was almost back to the "clear" water i glimpsed a seal alongside me, panicked some more and kicked harder than ever. I gave everyone a good laugh, especially my parents who walked it with me, because the seal had been following me the whole way and I was (thankfully) oblivious. The other recollection i have isnt so much a memory of mine as it is of my parents who would tie toddler me to the railings when they went fishing. We spent many many nights fishing up there and I am sad my kids havent been able to make the same memories.	Ive already mentioned length, but I do think this is a big one. It would be great to have the end at the extended width and then narrow back to another fishing section with another wide end.
Strongly support			I see seating in the pictures, I hope this is included. Would be nice to sit and admire the view.

Strongly support	Been waiting for a new jetty for a long time, I miss my lunch time walks on the jetty, this has been going on for way too long, please just build it :)	Sammy the Seal was the highlight for me, as well as sitting on a bench at the end of the jetty to meditate	I think the important aspects for me are railings on both sides and seating at regular intervals (not all squashed together). Don't know about diving or fishing. I have mixed feelings about a table to clean the fish, it attracts Sammy and friends but at the same time it's really gross :)
Strongly support	Would just love a jetty so my kids can experience a jetty before they grow up	No I don't need input	Fishing, walking, diving
Strongly support	Similar to original		
Strongly support	Old jetty well beyond repair and community deserve a modern day equivalent	No	Think it's pretty well covered
Strongly support			
Strongly support	I can see a lot of thought was put into this design and it will be great for the community		I think solar powered low voltage up light installed on the jetty will be money well spend, its low maintenance and also a safety improvement. Cameras can also run from this solar powered station to prevent vandalism.
Strongly support	Looks great		Not sure if this is the right spot but here I go. Rather than remove the existing structure, I would like to see the whole thing pulled down by 2 tugs dragging a chain. Most will sink and become a world class dive site that is full of leafy sea dragons and cowrie shells. Make it a reserve for divers, ie a no take zone except by line fishing. It will become a world renowned attraction. Assign a barge to patrol the area to pick up any floating bits. This will be much cheaper than existing proposed demolition options but provide immense lasting benefits. I think however the shire will reject this solution out of hand due to fear of litigation. It is time the council stood up, took a risk and behaved true to our slogan, "We make it happen."
Strongly support	There has been too much indision on this. Trust the experts to do their job		
Strongly support	I like the decent length of 400 metres. I like it is in A B C D conceptual segments encapsulating the old and the new. recreational aspects with the Diving and Fishing. The dual level of the jetty and the dive platform. giving the community the ability to maximise their Jetty experience. modern engineering and construction to take it into the future for the Esperance community.	1. Stepping of the ladder into the ocean for my first scuba diving experience in free water in my life. On the 3 day dive course I did with Lesley Hudson when I first got to town 20 odd years ago. Taking my children fishing for the first time as little kids. It was a safe spot to allow them to simply drop a line down into the water. the wind blew up and swept my daughters Barbie hat off. she still reminds me of that moment. She is now 19. the memories burnt into the towns children & adults.	Art and design as well as the practical - of accessibility. Space Width Length- maximising for biggest bang for the buck and make it comfortable for loads of people to utilise it at the same time.
Strongly support	Reflects the history and heritage of the tanker jetty while creating a new resource for locals and tourists in a way that compliments the foreshore		

Strongly support	We need to move on with this issue. The old jetty is falling apart and the longer we sit and argue and debate this issue the town is without one of its major attractions. Regardless of who is at fault regards the maintenance over the past 80 years its time to move on. I am not personally fussed about the design I just want a jetty in the town for al to enjoy.	No just get on with the project.	Add a 200m enclosed lap pool along side it for ocean swimmers can use with sharks being an issue.
Strongly support	Looks good. I just want you to get on with it	No. Memories are mainly based about being on it.	Easy access to water, fish cleaning
Strongly support	It captures the heritage of the original jetty and the form and functionality of a contemporary design which should last and require less maintenance	Capture some of the original uses of the jetty in displays among the jetty. Perhaps historic photographs, some of the equipment used etc	Good lighting Shelter/shade Benches and seats with roof
Strongly support	Best outcome for the township		
Strongly support			Keep non ratepayers and welfare cheats off it
Strongly support	The concept design will look more like the original jetty than the current one does! The train lines being placed back in (although flat) will make a big visual statement	Not really, just the kids fishing & the squid stains are all that I recall strongly	Ladders as proposed and the diving platform is a great idea. I also like the idea of the little sheds at the end
Strongly support	Because the time has come to move forward and this concept looks functional considering the allocated budget.	So many memories. None in particular. Beryls Eats was an icon for many years.	Rubbish disposal. Fish cleaning facilities. Appropriate lighting. Will power be available for various functions that may occur?
Strongly support	Meets the current wants of the community nity as expressed via innumerable social media whines over the past few years.	No	Move it to James St.
Strongly support	It incorporates some of the old with some of the new and strikes a sensible and attractive balance between the two. Although slightly shorter than the current jetty it but despite this provides recreational opportunities for a range of activities and user groups.		I believe the concept design has taken most of the demands and expectations into account. Listed below are perhaps few considerations that may not have been taken into account: 1. Appropriate lighting using reusable energy source such as wind or solar. 2. Fish clean down stations. 3. Incorporation of the existing facilities in and around the entrance to the jetty to provide a seamless transition between the land and the sea.
Strongly support	We have been waiting to long for something to be done so shire should just make a choice and go ahead with it	No	New jetty looks good
Strongly support	Because we need it to go ahead	Lower platform. Good to go for a walk, talk and fish	Lighting, cleaning fish area, position of dive platform
Strongly support	Ease of maintenance. Simple layout. suits surrounding area	Squidding off it 30 odd years ago. Jumping off it on pushbikes with rope tied to the bike for retrieval	All looks good
Strongly support	It's time for a new jetty that we can afford as a small remote town	Make sure it's industrial beginnings are noted Sammy the seal & his successors	Fish cleaning Seating Use the old timber in as many places as you can
Strongly support	The concept design will achieve an affordable jetty for the future while recognising the the past.	Fishing is very important.	in-built rod holders along both sides would be great. These could be precast into the concrete deck. seating without back would be good so that you can fish from one side or side facing the other side. access to water along the jetty would be good. length scales could also be inlaid so you can measure your catch
Strongly support	The existing jetty is way too long, this is a good length. Love the idea of a dive platform. Just want to see something happen	That this is where my daughter learnt to cast a rod and fish	Maybe some shelter from sun, rain, wind, yet not critical

Strongly support	Has a combination of the history of the jetty by retaining the initial section in the style of the original as well as modernising so that it fits with the foreshore upgrade. The footprint remains the same. Materials will be longer lasting with what seems like easier maintenance - possibly more cost efficient?	Most of my memories are to do with fishing and just being out over the deep water as a child. The new design seems a lot safer than the jetty back in those days with the guard rails down both sides. Also being able to view town from the jetty is a fond childhood memory.	I think that the recreational aspect of the Jetty is hugely important. For many it is the only way that they can dive and fish offshore. This also has a flow-on effect for the business operators (food vans) that are based at the jetty. The historical aspects are also important, such as the photo boards that were done for the various shelters/toilets along the foreshore. However, these boards should be done using Perspex or something similar so that if they are damaged/vandalised, there isn't the danger of glass going into the ocean. Perhaps multiple copies could be purchased so that if damage does occur, then the panels will match when replaced (unlike the Daw photo on the Jetty toilet block). It would also be good if the cruise ship transfer boat could berth at the jetty as this would be a much more pleasant arrival than the port. Maybe there could be a berth closer to shore in the event of bad weather. All councillors in the last election mentioned that more needed to be done to cater to tourism so this could be one aspect of this election promise.
Strongly support	Want a jetty	No	Fish cleaning should be at end of jetty
Strongly support	I feel the concept plan covers most of the reasons why people utilise the jetty. Love the way that the original design has been honoured	Catching my first fish and my kids catching their first fish from the jetty	Is there scope to increase the length of the jetty. Can there be an area where cruise ship tenders can drop off
Strongly support	Build the jetty as long as possible	Fishing memories	Easy access, wash down bay out further
Strongly support			
Strongly support		No	Maybe consider having a ready go design to add fenders to the end section lower platform. You never know, it would make a beautiful departure point for a glass bottom boat tour. Carefully select the bins - waste disposal points. Carefully consider the life ring design. Deck lights may look really attractive - relatively cheap to make the jetty a night feature Could teh end be a safe launch area for future fire works?
Strongly support	It ticks all the boxes. Classy, functional, respectful and practical.	The goods sheds and original infrastructure. The original cast iron ships bollards, rail, steam crane etc.	Shelter from the weather. Safe all weather diving and fishing areas. Good lighting.
Strongly support			
Strongly support	I think it reflects the old jetty well and provides what the community needs	I have dived under the jetty quite allot. The under the deck node is great.	Being involved in the artificial reef project currently, including some modules similar to those around the jetty would improve the fishing and diving.

Strongly support	Esperance needs a jetty!		Fish cleaning facilities, enough width for bicycles & pedestrians, safety ladders, diving platforms.
Strongly support			
Strongly support			boat tie up area rod holders coin or token operated telescopes fish cleaning station water for cleaning fish
Strongly support			
Strongly support			
Strongly support	Sick of waiting for a jetty, old jetty needs to go.		Pensioners able to easy walk the length.
Strongly support	It seems to address the concerns of and meet the expectations of most people in Esperance. I strongly believe that re-building or repairing is not a viable solution.	My best memories are of fishing with family or friends on a perfect evening and witnessing other people (especially children) doing the same . Being able to see the stars and enjoy the fishing with sufficient backlighting to see my surroundings and the ocean.	I like the plan as it is. I do not think a building at the end is a good idea as it will be subject to discussed rubbish and probably used as a toilet. A more open shelter like some I have seen on jetties in SA would be a good idea. The only criticism I have is that I have seen many jetties with similar interpretation and structures around Australia. I would like to see something included that is unique or iconic, to further 'badge' Esperance. The whaletail is a landmark that is unique to Esperance as are the foreshore bronze artworks, although there should be two or three more of those. Maybe a significant artwork or really unusua land artistic shelter design? I assume that a permanent underwater viewer is impractical. Continual cleaning would be required.
Strongly support	Because it's got old and new		Good ladder accèses the jetty to swim from .
Strongly support	Looks amazing!	Just get on with it so our grandchildren can forge memories on a hefty like we did. They gave not been able to do this with the rotting like that is on the bay!	Disabled access Sufficient lighting Multiple fish cleaning stations with either running water orca bucket on rop e like the old betty had
Strongly support	Waste of time to rebuild, too costly	Fishing as kids	No answer
Strongly support	Design complements the original jetty and provides practical function for public use. ie diving platform and fishing areas.		Ensure there are adequate breaks in the railing to accommodate fishing.
Strongly support			
Strongly support	Meets rhe community needs.	Fishing	Seating and shade
Strongly support	I just want the community to move foward so we can enjoy a jetty again.	No	Looks like most of it is covered in the design
Strongly support	Because it look like the old one love the driving platform and it can be made bigger later on		
Strongly support	I believe you are respecting the history of the old jetty plus incorporating new innovative ideas	No	Seating scattered throughout the length of the jetty, otherwise I think you've covered a lot

Strongly support	It has something for everyone. Not just for fishing. The dive platform is an excellent idea (although I personally do not dive). It shows that it is possible to move forward and still have the historical value. This jetty design is for more than one group of people.	Not really. It was always a good wander on a nice day. The few times I did go fishing off it was fun.	Maybe in the future look at using the rail way line that is going to be inlaid on the jetty (so it is more in line with the historical usage of the original jetty) for a mini train ride. Somehow have a viewing area where you can see the underwater action without actually getting in the water.
Strongly support		n/a	plenty of seating
Strongly support			
Strongly support	We need to move on without it costing a fortune	No, just a jetty we can walk on and fish off	Cost
Strongly support	Design in keeping with old jetty	Learning to swim	Strategic use of old jetty in design
Strongly support	Because it looks like the old one	No answer	Glass deck that you can under water - like a glass bottom boat, especially with old pylons
Strongly support	It caters for recreational activities and remembers the past	No	Inclusiveness- not everyone is able.
Strongly support			
Strongly support	The concept designs acknowledge and uses the history of the old, while giving us a long-lasting jetty to enjoy into the future.	Sammy the Seal who used to live at the jetty.	Ensure the ability for gophers to access safely - both for gopher users and pedestrians. Not a huge fan of rod holders, as people should just be able to hold their own fishing rods, otherwise people will overfish / take over the area with their rods. Dive platform at end is a great idea, along with the jetty dive trail.
Strongly support	You have tried to keep with the original design but also thought contemporary	My brother spent his youth squidding for pocket money - my dad loved to fish off it	
Strongly support	it seems to me that a lot of effort has been put in to accommodate all the various user groups and the various community members who take pleasure in whinging about the shire never accommodating them	N/a	i like the idea of fishing rod holders and definitely some shade shelters. something reflecting the esperance coast line in colour and design
Strongly support	It's a beautiful design, thoughtful and forward thinking	No	Nothing it looks to include disability access
Strongly support	The design of the new jetty will meet the wants and needs of so many people that use it. The new design incorporates the heritage values of the jetty together with a great modern design.		It needs to accommodation for diving and fishing; be wheelchair and pram friendly; good lighting and seating along the jetty.
Strongly support	It incorporates all users		Viewing area would be great to see the marine life on the pylons below maybe
Strongly support	It will add to the aesthetic while still keeping wildlife safe	Walking and fishing with my kids	I like how it is
Strongly support	Because fresh, new, modern but incorporates old parts of the jetty in a sustainable way	No answer	Safe fishing at night, tie on spots and good lighting.
Strongly support	I love the different sections, especially the historical section	Beryl's eats and eating hot chips while fishing on jetty	Don't put anything up high, the last design had metal poles art which is a waste of money and gets fish lines tangled
Strongly support	It looks good and will be there for my grandkids to enjoy. I like all three sections		Length is important to so many, don't overspend on the first & last sections - they add value but to make them longer will have a poor impact on the rest. If money permits go longer if not you've got it just right

Strongly support	I think it is a good combination of honoring the old jetty but giving a new one its own identity. Provides fishing, relaxing and sightseeing for all ages within our community.	No	I think it needs to accommodate activities like fishing and diving. Somewhere for people to sit, relax and reflect whilst incorporating the history of what was so the history can be shared by all who use it.
Strongly support	Time to move forward this represents the past and future	As long as you represent the original intent of the jetty in the nodes and out traditional landowners and first settlers	I think the design has it pretty well covered
Strongly support	It is the right balance between respect for the heritage, modern day function and affordability. The design is very evocative of the Tanker Jetty but not a reproduction which I don't believe would be appropriate	n/a	It's so important that it is fishing friendly and that there are places where people can sit that are sheltered from the cold and strong South Easterly winds (our predominate summer wind). I love the idea of lighting for special occasions. Use old jetty timber where ever possible in places that people see and touch. Timber brings warmth and character to any design. Wide imber kick rails (that's not the right term) would be great. I have seen them on a jetty where they were wide enough to sit comfortably on to hang legs over the edge. The divers jetty and connection to the existing dive trail is very important. Please save as much of the old piles in situ as possible, such important marine environment.
Strongly support	I am ready for new Jetty like two years ago!!!	No.	
Strongly support	Sick of people in this town on and on about the old Jetty I just need the new one!!		Just have the water and where I can clean the fish and hand when it done, I will be happy 😊
Strongly support	Really like the design but also want it ASAP	Loved to walk in the jetty with a coffee cat in hand	Happy with what ever we get. Lucky to be getting anything after the disgraceful carry on from certain people in our community.
Strongly support	The project has been going on way too long. These designs reflect the old and the new and this is a great step forward. You are never going to please everyone, this looks practical and reflective of what is needed	Catching squid Walking out to the end to go scuba diving out to the pontoon	Lighting Fish cleaning Easy access to dive platform
Strongly support	It is time to move forward and it certainly ticks all the boxes! Bring it on! Well done to the Shire, patience is a virtue!	Yes, when I came to Esperance from the UK, I loved nothing better then being able to catch herring and squid from the jetty..... something that I have never done in England and was the start of something new for me!	Good access and good lighting/signage
Strongly support	Great combination of retaining the history and providing enjoyment for a variety of hobbies/interests.	The 10 suggestions on the draft design are very good	Rubbish bins?
Strongly support	It is time to move forward. The concept designs for the replacement jetty have something for everyone.		
Strongly support	It's practical, ties some of the old with some of the new but mostly just because it's a jetty and it's moving forward!!	We regularly walked and rode the jetty as teenagers, diving from the platform near the end then taking our own kids fishing.	A dedicated walk/run/cycle lane to not annoy the fisher people would be awesome
Strongly support	I think it has taken into account all the functions that are required for the jetty as well as acknowledging the history of the former structure.	No	I think it is fine as it is.

Strongly support	Plan appears to look good and consideration for swimmers fisherman and tourist is covered.		Lights along the Jetty for night use and perhaps wind and rain protection area..nice to stand out of the wind to admire the views
Strongly support	I just want a jetty that looks good and can be used by everybody. This is long overdue!!	Ive grown up walking/fishing on the jetty and have alot of memories and we all need to have a space where this can still be done...without costing people money to have fun and make memories	None ...happy with what is proposed
Strongly support	It looks great, and just get it built.	Scuba diving on the jetty, finding tiny spindle cowrie shells on the sponges. Collecting them, and keeping them safe inside my dive glove.	Balustrade on one side only, to make it easier for fishing. Please keep some of the old pylons in the water, so the underwater life is retained.
Strongly support			Kids safety
Strongly support	Love the design and i am eager to see the town moving forward with a new jetty in mind.	No	Seating for those that want to take in the views.
Strongly support			
Strongly support	Looks great	Just using some timbers from original jetty	Diving platform and glass bottom viewing
Strongly support			Making sure it is wide enough to cater for everyone .
Strongly support			
Strongly support	We just want a jetty back		
Strongly support	It looks great and I think we need it ASAP	I remember diving from the platform on one side and fishing on the other side	Not too modern looking
Strongly support	I don't believe it is viable to fix the old jetty and it would be great to have a jetty. The design looks great!		
Strongly support	It has strong connections with old one, serve new purpose tourism, fishing. Old jetty past its use by date and too damaged by elements to extend its life	Not personally	Include as much recycle timber in art form / sculptures may ask different community groups , schools to get involved. The aboriginal community should be involved in telling their stories about the jetty. They have carving skills that could be incorporated in some of the recycled timber. Could be great to ensure people who are visually impaired could read some signage and ensure their safety on the deck.
Strongly support	It includes all the elements that are required, it is beautiful incorporating old and new		Old timber in art form, disabled access, fishing chart, fishing etiquette info,
Strongly support	It has a variety of uses to suit the Esperance community and embraces the heritage of the old jetty	I think the historic aspects should be a focus, in keeping with the already established style of the foreshore area.	
Strongly support			
Strongly support	I was definitely against the new bridge but now have had a huge change of mind, well done guys	My grandfather helped build the jetty the year that my father, his son, was born. Good old Stewart family	Maybe more seats
Strongly support		Like new concept with section like original	People's use, fishing and diving as well

Strongly support	It is attractive, functional, pays respect to the past and gives us a great facility long into the future. Better in every way- just do it!		The old jetty had long sections without rail or with the rail set back so fisherman could sit right on the edge. I think incorporating this feature would be appreciated by fishers. Don't let the health and safety brigade ruin functionality!
Strongly support	The design satisfied the requirements.	Sammy the sea lion.	Plenty of seating.
Strongly support	It is sympathetic to the old jetty, but adds some great features!!! MUCH better than the previous version put forward.....	Not really - I've only been in the town for 22 years. I've enjoyed some wonderful walks, and great fishing time, but that's about it.	Maybe some reference to the days when ships moored at the Tanker Jetty.
Strongly support	It looks so much like the old jetty	n/a	n/a
Strongly support			
Strongly support	It encompasses some historical elements		A viewing tank at the far end so everyone can see beneath the waves
Strongly support	On the face of it, it appears that most of the interested parties opinions have been listened to and attempts have been made to accommodate their wishes. The overall length is good and all appears to have been well considered.	All appear to have been catered for. I especially like the widened section, making reference to the original loading facilities.	I would like an area close to shore for boat to tie up short term (5 - 10 minutes max) so the boating community has access to the food vendors in the area. This could be in the form of a small landing area on the jetty or immediately adjacent to it. Obviously, safety and marine regulations would be major considerations with this.
Strongly support	The concept looks great, incorporates nodes displaying the history of the jetty, caters to many different type user groups and would last much longer than fixing the current structure.	No!t	It seems most of the things required are catered for in the proposed design, but maybe some wind shelters at the nodes for the predominant easterly winds.
Strongly support	Born and bred in Esperance, the jetties were part of our heritage. The jetty should be retained in the concept form as a recreation/tourism precinct	Diving	The existing concrete deck should be placed on the ocean floor adjacent the concept jetty to form an artificial reef/fish habitat
Strongly support	It represents what the community wants and needs, including general use and fishing.	Definitely the history of the jetty from being built and why and who built it.	Access and safety will be important for the tourist who will visit.
Strongly support	It represents the past and the future.	Sammy the seal	Less concrete more wood
Strongly support	The plans appear to be giving us a jetty that will meet the needs of the community while also acknowledging the old jetty and what it represents.	Yes, As the jetty in recent history has been a recreational facility I have many memories of our family fishing trips out on the jetty.	Good lighting for fishing at night. Some taps on the jetty for washing hands, fish ect. Larger steps on the stairs to make it easier for divers to carry equipment down to the water. maximise fishing access (ability to get around the balustrade to stand or sit on the edge of the jetty).
Strongly support	It incorporates old with the new. And hopefully built to last so there is minimum upkeep in the future. Look forward to moving forward and having a jetty. It would be wonderful if we could keep the old jetty but common sense prevails.		
Strongly support	It's time for a modern jetty. No use patching up old one all the time	No	Weather shelter near the end
Strongly support	Simple, straight forward and doable.		
Strongly support	looks appealing, caters all needs	no	may be areas of seating for the fisherman
Strongly support			

Strongly support	I think it has all concepts catered for. Fishing, diving, walking, swimming? Better than current one even did when safe	Not really. Having grown up in the area and school at the hostel high school all the jetty's have been part of my life. The old one at the Pier hotel was a must for diving and swimming in the 70's. As the design shows most recreational activities are catered for. You won't please everyone!!	Happy with the design for me but some others have noted some sensible ideas.
Strongly support	This is a design that reflects the old jetty as much as possible.	No	Shade shelters.
Strongly support	its time to look forward and stop living in the past, yes use the old timber to enhance the new structure so as the past is recognised.	a walk on the old jetty for locals and tourists was always a nice outing also fishing / squidding was always popular.	must have links to the jetty's past , fishing will take place all along the new structure , diving /swimming platform would be advantageous
Strongly support	It incorporates historical elements while providing a long term solution for all ages.	No, however I believe it should be as close to the current footprint as possible.	To accomodate leisure activities.
Strongly support	Good length. Simple, classic design. Incorporates the history of the original jetty. Caters for multiple uses. Fireworks on the wide platform?	Photos of past history. Ships berthing, railway trolleys, fuel boats unloading.	Plenty of seating the full length. Fish cleaning tables in the fishing section... not near the beach. Emergency ses communication near dive platform.
Strongly support	it answers all aspects of what people have been asking with in the jetty	no	possible incorporate underwater observatory for those that don't/ cannot dive , if required extend out 100 mtrs
Strongly support	I'm impressed with how the design addresses so many aspects - historical significance, tourist attraction, recreational facility etc. In particular I'm super happy to see timber being used for the decking, albeit that it is only the first 250m.	The efforts of the Save the Tanker Jetty group - albeit I appreciate that there are plans for something similar on the headland.	Lighting will be a significant factor.
Strongly support	Sensible solution	No	A new jetty will never have the length of the old one. What is important is to have several wide places for activities to happen. Fish cleaning doesn't need to happen near the shore but should be catered for.
Strongly support	Simple design that caters for most peoples needs. Not dissimilar to the original.		
Strongly support	Looks good. More solid than the existing jetty.		
Strongly support	We appreciate that the draft concept design replacement jetty as pictured is to our understanding a seriously practical attempt to gain the best mix of history, modern materials and practical use	The tanker jetty was and we hope that the replacement jetty will be a centre point and focus for the community of Esperance, visitors and tourists alike	LED lighting, possibly solar powered, to enable locals and visitors to enjoy the advantages of the jetty after dark
Strongly support	Modern in keeping with tradition	No answer	Just get it done
Strongly support	It's a part of our town	Taking my children fishing there	Lighting, seating, diving point
Strongly support	I like it	Platform at the end	Seats
Strongly support	It has something for everyone. It tells the historical story of the jetty and provides a modern sustainable asset for multi generational use. History and the past reflected are in the sections of the structure, as well as an ability for recreational fishing, walking, and education through the historical interpretation nodes. Well done.	None in particular other than the incredible angst the jetty has caused in the community since it was closed in November 2015. This has been felt by people whichever side of the replace versus restore argument they sat on.	Looks good to me as is.
Strongly support	Will look good and still retain a bit of the look and feel of our old beauty	Evening walks and watching ships being loaded.	
Strongly support	Because it looks great and it's well over due	Yes if it was a nice night My husband and I would take a lovely walk to the end and back catching up with whomever we new.	As long Jetty i don't mind
Strongly support	I think that the design ticks all the boxes for what the Esp community have asked for. Fishing, recreational, heritage, diving and I really like the acknowledgement to the old jetty.	I used to fish on the jetty with my parents at a very young age. It was exciting for us kids as being from the Goldfields we used to love the cool breeze and playing with other kids.	I like the way the design is now. I think it works well as is. Others may have more ideas.

Strongly support	Inclusive of all areas of concern. Allows for everyone to have their wishes met, i.e. retain heritage design, cater for fishing and also divers	No, only the family interaction that was always visible, young and old enjoying time together	Fish cleaning area segregated. Ensure it is clear down the middle for easy access
Strongly support	I think it has a very good mix of all the elements that are important to the public, some heritage, some fishing and leisure as in diving and a very nice visual.	No	Enough seating and a possible shaded area
Strongly support	Because it caters for all ages and activities - fishing, walking, scuba diving, swimming. It's well designed and I like that it has included historical parts of the old tanker jetty	No answer	Safety - life saving belts, emergency phone numbers, good lighting (solar powered), cameras to deter vandalising/graffiti. Bike rack for cyclists who enjoy a ride out to the head of the jetty
Strongly support	Old timber jetty rotten, need new modern jetty for next generation	School swimming carnivals in the late 60s	I'll leave it to the expert designers. Anything will suit as it will be a brand new jetty
Strongly support			
Strongly support	it looks beautiful. It is linking the old with the new, is catering for all, walking, fishing, diving and just looking. also the wider end may be suitable for small activities. I think you have been very respectful of those that did not agree and have recognised that we all need to be heard.		
Strongly support	It addresses all the concerns of the community, ie acknowledges the heritage issues as well as catering to recreational fishing & diving activities for our locals & tourists alike.	Special memory - the statue of Sammy the Seal was always a delight to see.	
Strongly support	Excellent compromise of heritage, social, recreational and financial concerns		
Strongly support	We just need to get on with a replacement.	Just walking along it chatting to the fishermen and other walkers, community members.	Definitely ballustrading, ladders and maybe a lower landing.
Strongly support	We just want a decent jetty. I think this design is pretty good and much better than the last. I love it.	We just used to love fishing and walking out along the jetty to take photos of our beautiful town. The water is so clear most of the time and we can see the life under the water. I think the design includes most things needed.	A hose or water access to clean up your mess after cleaning fish and squid.
Strongly support	Looks very practical		Cost effective
Strongly support	Esperance we need a new jetty & it will look fantastic!!		
Strongly support	The new plan looks great.Love the diving platform,also it's been way to long without a jetty		Definitely need somewhere to clean fish also seating maybe made out of the jetty wood
Strongly support	I believe you have captured everything here, love the inclusion of old jetty timbers. Diving & fishing decks, information nodes etc Can't wait to see it come to fruition	Not anything specific, I was in my 30's when we moved here. My children loved going down for either a fish or walk. My Mother in law loved going & sitting in the car park (unable to walk) have a feed of fish & chips & just watch	I believe you have already captured these in your draft. Plenty of seating above for the elderly
Strongly support	I have great faith in the Shire that I helped to elect. So far all that they have done has improved the Esperance environment	No	Personally, not that I can think of
Strongly support	I believe the design will cater for everyone's needs.		
Strongly support	Think it has incorporated the old and the new.		
Strongly support	We appreciate that this concept design replacement jetty offers more similarity to the tanker jetty than other suggested possibilities.	While fishing on the tanker jetty we experienced a mateship with others, offering bait, advice or even help to repair tackle	If the low level dive platform could be lighted like the jetty decking then some of the fishing fraternity could use the dive platform at night.
Strongly support	It seems to have captured something for everyone to appease the most critical complaints	No answer	Keep it pleasing to the eye but more practically simple for users
Strongly support	Fix it, soon as possible	Walking, diving on jetty	No answer
Strongly support	Tourist attraction. Icon for Esperance. As soon as possible.	Miss Sammy the seal	Fishing. Seating for strolling on the beach. Tourists
Strongly support		how far out it went	longer for fishing

Strongly support	Having both historical and modern concepts in the design good choice	No	Have fishing platforms that can rise and fall with tides to make it easier to land 🐟
Strongly support	Get it done	NO	No answer
Strongly support	Current jetty is past use by date. Just build it - new one	Swimming carnivals. Using Mr Don McKenzie's boat	Safe fishing and walking along jetty - good railing
Strongly support	Need somewhere to fish, also the tourist attraction to Esperance	The beauty of a jetty in its original form	Utilising original timber for making benches
Strongly support	Looks good and will do what i want.	No	The platform for getting into the water is a good feature.
Strongly support	It meets the needs of a town recreational jetty and as a new structure will look clean, modern and fresh and have no maintenance issues for some long time.	The jetty was previously used as a fishing facility and I think this new design facilitates that use.	No suggestions
Strongly support	I Think it covers all aspects of peoples needs it is going to be a showpiece	no	Looks like it is all covered
Strongly support	No answer	No answer	No answer
Strongly support	Even though we have strong sentimental attachment to the jetty, always spending holidays here from the 1940s, and now residents of the town, it is time to move on and build a new structure.		
Strongly support			
Strongly support	Because our town needs a new jetty	No	I believe that in this day and age there should be better decking material than concrete
Strongly support			
Strongly support			
Strongly support	too much time has been wasted arguing between restoration and replacement when it is obvious the jetty is past its use by date.	no	more seating at intervals along the whole jetty adequate lighting
Strongly support	Because this saga has been going on for too long, thanks to the loony fringe.		
Strongly support	About time all looks fantastic	Nil	
Strongly support	New jetty would be better than none at all	No	Maintenance free. Malboard, plastic wood grain decking
Strongly support	Steel or concrete is more durable and economic	Light rail car with video explanations solar powered, accredited volunteer drivers	Light rail car computer controlled
Strongly support	It looks like a simple practical solution. Let's just get on with it	No	No answer
Strongly support	Esperance needs the jetty for the town, for tourists and recreational fishing	The old jetties had landings close to the water that smaller boats could pick up people from. Good for fishing off too.	No answer
Strongly support	We need a jetty for the town - locals and tourists	No, not to hand	Maybe put the swimming platform/access closer to the shore
Strongly support	I hope this design will satisfy and unite all of the jetty vocal groups, environmental authorities and those of us in the silent majority who look forward to a new era for a jetty all Esperance can be proud of.	No	Bench style seating away from the jetty fishing area. Overhead lighting for safer night use. Maybe a kiosk for light refreshments at the end of the jetty
Strongly support	I feel the concept design is well thought out and reflects the original structure and fulfilling the needs of future users. Another 50-100m would have been perfect	Perhaps research the names of those intrepid waterside workers who moored and unloaded the boats which called here collecting grain and fuel boats unloading	Not seeing any weather shelters to provide respite from rain showers
Strongly support	It looks good. I am opposed to retaining the old jetty but because of the sentiments of some of our people's feelings as regards the heritage of the jetty then let's all compromise a little and have the historic section included and get on with the job	I have no historic memories of the jetty and think that your ideas of interpretive nodes from 1 - 10 is a great idea	I think the pictures of the jetty as per your draft concept is just wonderful. Once the structure has been built then maybe a few extra handrails etc. lighting, etc can be added if needed
Strongly support	It's time for action - the silent majority feel that way	Learnt to fish on the old jetty, taught my children and grandchildren to fish on the new jetty	Looks good. Get on with building it - no more talking - do it

Strongly support	All good, let's go	Get on with it	No answer
Strongly support	No answer	No answer	No answer
Strongly support	It has been a long time coming, a lot of money wasted in the process but finally some action! Now let's just get on with it and begin construction.	No. Alas I am terrified of walking on jetties, but look forward to seeing this become a reality finally.	Hand rails, plenty of seating, wheelchair friendly and of course cleaning tables.
Strongly support	The architect seems to have incorporated some of the features of the original jetty into a modern concept.	People walking and fishing on the jetty - which have been planned for in this design.	Not sure.
Strongly support			
Strongly support	Do not care what sort of jetty replaces the old one but feel it is important to have a jetty, particularly want to sett the old jetty timber put to good use in the community	No answer	No answer
Strongly support	No answer	I think it will be so good to see the old tanker jetty standing out in her glory again	No answer
Strongly support	No answer	No answer	No answer
Strongly support			
Strongly support	It looks much like the original and does the job.		
Strongly support	Needs a new jetty for fishing	Diving, kids love to dive	No answer
Strongly support	Happy with the design and would like the project to proceed ASAP, good fir the town		
Strongly support	Think it will be great for the town.	Gishong from the jetty as a kid	Sufficient lighting so you can fish at night. Railings.
Strongly support	The designers have tried to encompass all different views of the community in a sensitive and aesthetic way with this concept. Thank you.	The great friendly atmosphere on warm summer evenings among the fishers and the public. Public/tourists going for walks and engaging fishers to see what they had caught. Just lovely.	The railings need to be considered because they could hinder fishers from being able to cast.
Strongly support	Because it aims to provide for a range of opinions and things need to move so that we can have a jetty. Enough time and money spent trying to get a compromise!	Childhood summers spent fishing off it and catching many mackeral to feed everyone.The interesting older people of the time in Esperance who were great characters.	Just get on and build it. Everyone will never be happy and some are determined to be extremist and obstructive. They will never be placated whatever is done and it's time to see them off. Perhaps it is true that they have served a purpose but that time is well over.
Strongly support	Enough of Esp RP crap	No answer	No answer
Strongly support	It answers all the needs of the public	No answer	Incorporating some of the old timber
Strongly support	Because it looks beautiful	No just that I miss it so much, we always used it	No answer
Strongly support	As a regular walker on the jetty before it was closed I would love to walk along a jetty before I either can't walk or pass on. Please just build us a jetty.	No answer	No answer
Strongly support	The plans look good to me, please get on with it.	No	No answer
Strongly support	I'm sick of all the delay and arguments among the vocal minority. I think it's obvious the old jetty is past its day & we should start a new one ASAP.	No, sorry. I am too old to deal successfully with modern technology.	I'll leave all that to the experts.
Strongly support	Because getting a new jetty with bring more people to town and will be a very good thing for the town and the community.	Going down to the jetty with my family and getting a drink from the coffee cat, going for a walk on the jetty and seeing sammy the seal.	Make the jetty to all people of all ages and people in the community.
Strongly support		i caught my frist shark and squid on that jetty	it would be nice to walk up there in the ufernoon and at night you can go for a fish without your parents stress if your ok

Strongly support	Because it looks much stronger and safer than the old jetty and as I loved the jetty I would love to have a new one that is safer.	Fishing was a big part of my family's life and and I would love to make some more memories with my grand parents before they go.	I think you need to reconsider how and what your going to use to make the jetty, and make sure that its safer and stronger than the one before. You should definitely put railing on the side and possibly a fence on the lower part of the railing so that no little kids or anyone else can slip and fall off the jetty.
Strongly support	it is an efficient and pleasing concept	many families love to get some takeaway and sit on the jetty. it would be good to have a nice seating area for this	benches to clean the fish etc
Strongly support	We need a new jetty	I just want one we can use again	Suitable for everyone. Activities at the end of the jetty like stalls etc
Strongly support			
Strongly support	The design incorporates the heritage of the original and is a simple and functional design. It has a dive platform which allows more recreational use nd the track embedded into the design looks good. The wide end of the jetty allows for more social use and lets people other then fishers to enjoy the jetty.	No. What has been proposed is fine for me.	Firstly, keep the dive platform. Something like this is normally the first to go due to budget constraints and it would be disappointing if it did get removed from the design. The seating in the wide end. The use of bench seating in a modern and minimalist design shaped in a way that allows for groups of people to sit and face each other or face outwards to admire the view would, would create a sense of belonging. High-backed chairs or benches prevent people from facing one another and engaging in conversation. I think some sort of stylised lighting would be great. Maybe blue LED lights that sit atop the hand rail over each support pilon, and go out to the end of the total length of the jetty (520M) in the ocean. Have the ilghts flash or run along the length to the end would be an attractive feature during the evenings and nights.
Strongly support	Love the design and want a replacement ASAP so we can start enjoying it		
Strongly support	I like how it incorporates aspects of the old jetty but also has new bonuses.	Definitely Sammy the seal but I'm sure that's already high up there and noted	Nothing more to note than what is already in the design
Strongly support	It would be great to have a jetty we can use. Great job	No answer	Using some of the old jetty parts to make it not so modern
Strongly support	Good length (nearly as long as pre-existing jetty). Good width - able to promenade along. Interesting information on interpretive nodes. Reasonable cost	We just love walking up the jetty and seeing what people are catching, particularly at sunset	Appropriate lighting. Good fish cleaning facilities and waste disposal.
Strongly support	I as a rate payer feel that this is a fantastic move forward for a our community and there has been so much thought out into the design to cater for different interests in our community.	I just enjoy walking the length of it and look forward to doing it with my young family in the near future. I enjoy talking to my children about the history of the town so some reflections of the past dotted along the walk would allow for natural conversation about the history of our town.	Fishing is something so many people do in our area that this needs to be a serious consideration. Providing supports in place that allow all members of the family to enjoy this would be fantastic. I also think that putting underwater structures in place that encourage varied fish life that children and adults can experience through diving or snorkeling would be great too.

Strongly support			
Strongly support	Looks good. Attempts to appease all groups.	No	
Strongly support			
Strongly support	It's a fantastic design. A jetty is well needed and I can't wait for it to happen	No	No answer
Strongly support	Has historical parts of the old jetty, information/history of the original jetty. The dive platforms are great too.		Place to scale/clean fish. Perhaps a shelter somewhere along the length in case you would like to shelter from the rain/sun while enjoying the jetty. Places to sit and enjoy the views. As much historical information as possible
Strongly support	I believe it covers all aspects of jetty use. And covers many different groups who would like to utilise the jetty and area	No, I have rarely visited the old Jetty	I believe all aspects have been covered from what I have seen in the concept plans. I would like the new jetty to be the length of the current jetty
Strongly support	Love that it incorporates lots of history, accommodates fishing and diving and lots seating.	I've only been in Esperance ten years. As a part of the Festival of the Wind in 2015 we had the event Esperance Odyssey which encouraged people to visit places around Esperance and collect stamps. The Esperance Lions club did their have a go fishing on the tanker jetty. It was hugely successful and there is a couple of really great photographs of kids with their catches.	Handrails?
Strongly support	I believe it honours the historical element of the Jetty while also bringing it into the new era of existence as well. I think it is quite a well thought out design and will be enjoyed by all.	no further comment	no further comment - I'm happy with the proposed design
Strongly support	Being able to fish from a jetty is a big part of Esperance tourism and culture.	Retirees and kids , all generations, catching herring and squid and people walking the jetty checking their buckets for the catch.	Keep it along the lines of the old jetty with the additions shown on the draft plan.
Strongly support	because the old jetty is well and truly past its useful life	no	keep railings as low as possible
Strongly support	Jetty provides a focal point to exercise, enables interaction with the sea (fishing, walking children, meditation, diving and swimming), attraction for visitors to 'see'	Fish cleaning station and sammy the seal Scuba diving off end	Shaded areas, perhaps associated with seating. Provision of drinking water foundations. Wider than normal steps down to dive platform as persons will be carrying up/down heavy dive gear. Hand rails on steps for added stability. Experience from Busselton jetty would be to have a lockable rail/bike rail near by, as people will use some form of wheeled 'trolley' to convey equipment from carpark to diving platform and you don't want it stolen when diving! Ensure good lighting on dive platform's entry/exit point as people will commonly use the jetty for night dives.
Strongly support	Looks great, about time!		
Strongly support	Time to move forward. Believe restoration and on going maintenance of original will be to expensive and an on going burden to rate payers.	Fishing and Malvern Star bicycles scattered haphazardly where kids were fishing	Keep it simple.
Strongly support	nice to see dive platform incorporated. like the combination of old and new with 'low maintenance' concrete		
Strongly support	Anything is better than nothing	Being pushed off to go swimming when coming down from the goldfields for competitions.	Fine as concept design is

Strongly support	The old jetty has been an icon in this town forever and my family originally from Kalgoorlie prior to moving to Esperance have had family holidays here and the jetty was always the go to place to catch a fish or two and in my case as a small child is where I learnt to fish and fillet fish . It would be fantastic if our shire can get us a new jetty built and we can start again and capture the memories and the hearts of our tourists and holiday families again . (the jetty sadly missed) Here s to the new jetty love the new concept .	Sammy the seal was a huge attraction . I am sure he will be back again once we can go fishing there again he attracted tens of thousands of tourists and locals from surrounding towns the kids loved him .	It would be fantastic if the shire would consider an underwater observation room as a possible addition or allow for in the future . (these are a proven revenue raiser)
Strongly support	It's functional and aesthetically well designed	Happy as is	Stick with functionality , safe use for minors as good as practical and vandal proof where required
Strongly support	Great design.....and practical	No	I think the concept put forward covers everything i would like
Strongly support	Looks good	Walk to end, sitting and watching for dolphins and seals	More seating needed
Strongly support	This concept design incorporates all of the important elements of the original jetty, that are important; culturally, aesthetically and functionality.	My dad worked on this jetty when I was a kid, as he was a 'wharf' . Will there be any mention of those people whose workplace was the tanker jetty. (Known as the 'new jetty' then.	I had an idea today, about those rail tracks! Rail tracks could be incorporated into the design, for a mini rail system - would be wonderful for the young or the frail. I know I'm dreaming, but you could keep it in mind for a future possibility.
Strongly support	I like the acknowledgment of the past moving to the practical uses of the present. I like the simplicity of the design. It is not a showy jetty, it will be inviting to go for a walk or to go fishing I like the width and the length (although it would be nice if it could be longer)	Possibly acknowledging Sammy and his smarts for being around when the fishermen/women were cleaning their fish. The transition of a working jetty to a community jetty - how it became a family outing to go out in the summer evenings to fish	The bench seating along the length is a good idea. Water points for drinking water or rinsing off. Good lighting A good width so that it is not crowded when moving past people who are fishing
Strongly support	I strongly support this fantastic design so the Shire can get on with getting the town a jetty! It is a miserable sight to see the old jetty falling to bits. THE ESPERANCE TANKER JETTY IS BEYOND REPAIR. You don't need to have a degree in engineering to see that it is flogging a dead horse to try to "refurbish" this crumbling pile of rotting wood. TO THE SIRE OF ESPERANCE, HERITAGE COUNCIL, SAVE THE JETTY GROUP....."just get on with it" the town is sick of the bickering and just want some type of recreational jetty.	The memories that I have of the jetty from my youth are being diminished by the sight of the old rotting pile of wood in the bay. Just get on with it and give us a new one.	Fish cleaning stations and some sort of platform close to shore for the kids to jump off. I know they have the james st jetty to jump off but I figure that another one would be an added bonus to the new jetty.
Strongly support	It's modern, incorporates some of the historical materials from the old jetty, serves all types of recreational activity and will last many years. It will also compliment the stunning foreshore.	No, I loved the whole think but no special part	Some sort of trolley hire (for a token) would help people get their equipment for diving or fishing along the jetty.
Strongly support	Good compromise in style and usage	No answer	No answer
Strongly support	because i have lots of memories	fishing at night and early morning	put the wood on the paving on the that old jetty had then put it on the path.
Strongly support	because we need a new jetty	go for walks along	have a big circle at the end and have stairs down to the the bottem
Strongly support			
Strongly support	I think it is a very good idea, it is an amazing idea that keeps the memories of the jetty still with it while also making the jetty a more stable and long lasting construction. hopefully it will stand long enough for many other memories to be made over the years.	I remember every Saturday my dad would take me down to the jetty to go fishing. On that jetty I learnt how to cast my first line ad I caught my first fish. That jetty has a lot of sentimental value towards me and my family.	Add a sort of glass casing under or off the jetty so its like an aquarium, people could go down on stairs and have a look at Esperance's wonderful sea life. in this it could also stop people from harming too much of the sea life so we have a beauty to look at.
Strongly support			

Strongly support	Just make it look dope	Please make the jetty futuristic and put a wave machine on each side x	Yeah just dont screw it up, will look cool as long is it is longer than the old jetttt and has a wave machine x
Strongly support	Very happy with this deign and how it keeps with the theme of the original jetty.		Fishing and diving nodes, seating and fish cleaning facilities
Strongly support	Because this has just taken too long and we just need something that we all can use for generations on.	Maybe some thing about all the old ships that use to use the old jetty.	Would be good if you could include some rail tracks on the jetty to be able to use for for people or elderly to access the end with ease which could be a way of extra funds coming in and for divers and fisherman to cart gear to the end and some solar power lighting on jetty.
Strongly support	Great design, retaining old & new. I really would love Esperance to have a jetty again to compliment our beautiful foreshore.	Fishing, walking along at night checking everyone's catches.	Great as is 👍
Strongly support	I believe it meets most of the jetty's requirements in length, materials used together with safety factors allowing, eg, an ambulance to travel on it. I might suggest that a turntable be installed to allow a return to the foreshore	Perhaps using the remaining timber pylons, when dressed, to provide seating, vertical fences around the foreshore and any other benefits to allow some of the original to be preserved.	As above
Strongly support	It best represents what the community wants within a budget that is affordable.	I mainly used the jetty for fishing and seeing Sammy the seal as a kid.	Good lighting for night fishing. Cleaning station for fishing which may also attract another Sammy.
Strongly support	The design is great and takes a lot of the concerns people have into consideration. It's a great alternative to what we use to have with the tanker jetty	We use to do walks along the foreshore then up the jetty on a regular basis. As a child, I loved making it to the end and going down the steps to the platform at the bottom. The jetty is also where I caught my first fish. So many fond memories	I think the design covers everything already
Strongly support	The concept design is faithful to the design of the original jetty, respecting and honouring it, while also being modern and economical.		I believe the design, if it includes the elements listed on the Concept Design such as a fish cleaning station, low-level dive platform, ladders, seating etc. is perfect as is.
Strongly support	The jetty is a huge tourism draw, a brand new one would look great and be very popular. Something needs to be done	No	Ease of access
Strongly support	We are just happy to see that we will have a jetty to use in this beautiful town.		
Strongly support			
Strongly support	It incorporates new and old and is the way forward	Getting beryls eats on a sunday and walking down the jetty while waiting for your food	Unsure
Strongly support	It considers different uses and incorporates the heritage aspect. The design looks good and will fit in with the foreshore.	Sammy seal, fishing at night.	Good lighting, safety rails, shelters people can sit under for shade when fishing.
Strongly support	Love the different aspects incorporated	Kissing boys and having free time away from parents ha!	Rails so my kids don't fall over! Lots of stairs down to the water in case I fall off I can climb back up
Strongly support	new jetty is a great design it has a lot of features, good construction and will last a long time and save the community and the shire money in the future.	fishermen feeding sea lion at the start of the jetty with there fish scraps.	hand rails need to be small child safe
Strongly support	It incorporates historical features in a modern way.		
Strongly support	It recognises the historical and heritage significance.	NO	Must accommodate fishing and diving activities n=but be sympathetic to people who just want to walk to the end or even ride a bike. Must have a fish cleaning area.
Strongly support	it looks similar to the existing jetty	being able to fish from the jetty	a few places for people to sit
Strongly support		no	

Strongly support	i think its a great idea and i like how they are keeping parts of the jetty	Sammy the seal fishing with my family jetty jumping	make gazebos every so often with chairs diving platforms and ladders i think that you should make it 2 km long and put a small train on it, people have to give a gold coin donation which the money will go towards the maintenance of the jetty make the walking path out of timbre not concrete so that it does not heat up put lights under the jetty so that you can see the fish at night
Strongly support			
Strongly support	because the jetty is a big part of esperance	when we used to see sammy the seal swim past	more attractive, easy fishing spots that has easy use age, easy for people to use
Strongly support			
Strongly support	I miss the jetty. I think this design is a fantastic idea	As a child me and my family would always walk up and down the jetty all the time. Maybe include bits from the previous jetty	Fairy lights and a hangout spot at the opening
Strongly support			
Strongly support	Why I feel this way is because when the jetty was around the family would go and get the rods and stay and fish. This is because nowadays you just have to look at it.	A special moment I had was learning how to fish off the jetty and walking up and down when we had nothing to do.	Something is lollypops to everyone on the school holidays. Another is test on the jetty like question board around and on the jetty about Esperance.
Strongly support	itll be fuckinn skitz	i lost me fooken thongs underneath	i reckon the design already will be cool
Strongly support	Respects the old jetty but has a range of activities that the next generation seek	Fishing	Cleaning tables, lights, seats
Strongly support	I like the design and it will bring more tourists to town	No	No answer
Strongly support			
Strongly support	New	No	No answer
Strongly support			
Strongly support	The plans both pay homage to the old jetty, while providing a sustainable and functional jetty that will serve the coming generations well.		PLEASE!!!! Do not put any poxy arches over the top as they are just asking for people to be pooped on by birds. Possibly solar panels on the light to provide extra sustainability and green energy
Strongly support			
Strongly support	Because Esperance needs a jetty	Yes, my parents used to taken us down there when we were little and would watch Sammy the seal	
Strongly support			
Strongly support	its a strong structural concept	Nope	Make sure there are seat benches and also table benches
Strongly support	Simple, practical and incorporates the history of the old jetty.	No	Built in chopping boards/benches for fishing and cutting up bait and a hose.
Strongly support	I just want a jetty that works. Good for fishing, safe for kids, easy to upkeep	No thank you, I'm sure others have better	All of the above and easy to upkeep and replace so this issue doesn't happen again, give us nothing to whine about
Strongly support	It is a great layout and will work perfectly for all ages and activities		Accommodate easy access for divers and fishing. And great rail support for children and the aged
Strongly support	The jetty considers people of all ages, abilities and interests.		
Strongly support		fishing for squid	
Strongly support			

Strongly support	I would prefer a jetty that can be utilized compared to one that's old broken and can not be used.. it looks like a great design.		I think it has considered everyone's needs.. it's really great..
Strongly support	The design has many different areas that will be used for different activities		Making sure the wood floor boards won't be slippery if it rains. Having plenty of lighting and support rails.
Strongly support	A good compromise to please as many people as possible. This project really just needs to get going and I'm happy with this design.	Just want to be able to create new memories.	It needs to be accessible to everyone and there needs to be room for a variety of activities not just one over the other.
Strongly support	It looks nice and it's practical		Fishing rod holders, A LOT of benches
Strongly support			
Strongly support	I feel like a new improved with a little bit of the old would be amazing the jetty is a massive tourist attraction and an awesome place to fish so it would be perfect to accommodate for everyone's needs		It needs to accommodate for everyone's needs from fishing to diving to just a lovely walk
Strongly support	It's an amazing design that I feel like no one in the community can't not be happy with it. Let's just get on with it and get a new jetty.		
Strongly support	Esperance needs a jetty that has many uses	Climbing down to the platform	No answer
Strongly support	Looks amazing	I think that the new jetty should have reminders and information about the old jetty, as well as the Sammy the sea lion sculpture.	I like the design as is.
Strongly support	Looks good. I just want to have a jetty again already		
Strongly support	It represents the history of the old Jetty and the functionality on modern recreational Jetty	No	Seating, break out spots to fish, architectural lighting and information stations
Strongly support			
Strongly support	With complete respect and track of the past it is such a cool step into the future	As a very young lad I would go with mum to find the great grandparents fishing on the jetty. So I could look at all the fish in the buckets. Then as a teenager we would camp all weekend at the end trying to catch sharks! Which we sometimes did. Sammy the seal, Berals eats and the big black ray.	Lights. Taps on timers
Strongly support	Because I've spent the last 12 months traveling Australia visiting many coastal towns big and small that all have massive tourism industries and do everything they can to bring people to their towns to support local business and the one thing Esperance lacks is the ability to step into the 21st century. We need change and this new concept will bring that and many other opportunities.	Not that I can think of	
Strongly support	I feel it has something for everybody	No just moved here.	I think there should be like a glass viewing platform at the end. And the diving/glass observatory at the end should be a fishing exclusion zone. I agree the inbuilt rod holders along the fishing zone would be great. Also fish cleaning facilities are a must
Strongly support	It addresses something for all the people who have continued to not hear anything, but replace.	Sammy the seal donation	Bike/fast lane
Strongly support			
Strongly support	It's time for something new		
Strongly support			Easy access to the public and free (would be best). Keep the diving trail available and recreational fishing.
Strongly support	Something for everyone and hopefully something the community and visitors can utilise for a very long time		

Strongly support	I like how the design retains heritage values while also creating an affordable, sustainable jetty that will be iconic in its own right.	Sailing around the jetty, walking along it, fishing, getting Beryls and eating it on the jetty.	Ensure that the design is suitable/safe for families and small children. Suitable fishing areas.
Strongly support	I just think its time we moved forward and got it done. The concept is visually appealing and also appeals to a range of people with the community who have various interests. It respects and recognizes the past jetty and moves forward into the future with a new jetty for generations of new people to enjoy.	No	I think the shire will be able to come up with those ideas within themselves.
Strongly support			
Strongly support	It incorporates everything we would need or want in a jetty!		
Strongly support			
Strongly support	It's about time we had our jetty back	Sammy the seal	Wheelchair freely
Strongly support	It keeps the original look of the jetty	No	I think having the lower platform makes it great for divers
Strongly support	I feel that the concept design is very well thought out and while being modern and practical, it still brings value and attention to the history of the old jetty which is very important to the local community.	No not really anything specific other than fond memories of walking the length of the jetty and fishing from it albeit in bitter conditions.	Seating options along the jetty would be greatly valued. Also some dorm of lighting for early mornings and evening strolls/fishing ventures.
Strongly support	We definately need a jetty and a new one at that. This design looks modern whilst honouring the old jetty		
Strongly support	Ticks all the boxes for a replacement and caters to the different needs of the community. It is interactive and get used, rather than just looked at.	No. Happy for new ones to be created.	Looks good how it is.
Strongly support	It honors the original jetty while still providing for the community and tourists that visit Esperance a functional jetty, so that people will be able to enjoy the recreational past times they have been unable to enjoy since the tanker jetty was closed, in a way that is going to be sustainable and easier to maintain with less of the risks (eg. teredo worm) of a solid timber jetty		while functional and easier to maintain than wood, the pre-cast concrete deck is not attractive to look at, especially after it has acquired a covering in seagull and pigeon poo as well as scales and ink left behind from fishing, since the hope of the community is that the jetty will hopefully return to its status as a tourist attraction, and a place where people can enjoy a stroll along the deck in the summer evenings or to sit and enjoy some fish and chips, there needs to be some consideration on how to make the concrete decking more aesthetically pleasing, especially as walking along a concrete deck doesn't have the same sensations as walking over planks and also lacks the sound of the wooden boards. Also to ensure access is viable to all community members and visitors there should be seating available at regular intervals along the length of the jetty (maybe the design of the seating could also be a nod to the original structure of the jetty in the design or materials used) as there was on the original, places where people can enjoy the view or have a breather if very young, old, sick etc.
Strongly support			
Strongly support			

Strongly support	great variety and excellent fishing section, assuming you dont charge us to use it.		making recreational activities around Esperance free for low income families
Strongly support			divingplatforms
Strongly support			
Strongly support	Looks great and will do job	No	Ongoing maintenance plans
Strongly support	Because it looks great		
Strongly support	Hurry up and get on with it	No answer	No answer
Strongly support			
Strongly support	Because it seems to have made all the dicks that have caused such a kerfuffle shut the hell up - and it looks great	nope	Cost - stepped foot on the on the old one maybe three time in 30 years, probably use this one less. Build a new stadium.
Strongly support	I think it looks fantastic. It is catering for everyone.	Just going fishing and squidding with my Dad and Pop who have now passed away. We used to go down early morning catch a heap of herring and fillet at the fish table then back home to cook.	Chairs, perhaps a picnic table at the end
Strongly support	Similar look to the old jetty		
Strongly support	Looks great and is catering for everyone in recreational use.	When I was young myself and brother who ride our bikes to the end of the jetty and catch squid. We would then sell these to the corner shop to make some pocket money. As kids we were always up and down there checking what everyone has caught.	If rails are compulsory now the jetty will be recreational, it would be good that these will allow people to sit comfortably and fish without being an annoying barrier. The dive platform is a awesome idea.
Strongly support	It looks great! I feel the shire have really listened to feedback and the jetty incorporates many people's needs. It brings new and exciting development whilst respecting its past/heritage. Ticks all my boxes!	Fishing off the side! But that's taken care of	Fish cleaning/filleting area. Barriers for safety especially for kids fishing from sides, information and pictures about life under the jetty... ideally a viewing platform (glass bottomed or similar) would be great for education about the area and marine life
Strongly support	combines old and new	Sammy the Seal	
Strongly support	Its a great design and the old jetty is old and crap	Nope dont care	None
Strongly support	Newer is better, this is all-inclusive and will be enjoyed by everyone	the jetty is the perfect place to meet people on those long hot summer nights - you don't even have to enjoy fishing to appreciate it!	Wheelchair friendly shaded areas
Strongly support	The existing jetty is beyond repair and needs replacing. The concept design would be an asset to the Esperance community and visitors.	No	There needs to be a Cafe / Snack bar and anablution block at the end of the Jetty. This would greatly improve the amenity of the jetty. There also should be consideration for a form of transport to take people to the end of the jetty. This would enable disabled and the elderly to enjoy the jetty as well.
Strongly support	A good mix of old and new, need to look forward and not get stuck with the idea of utilising material that will need replacing in another 40 years.		
Strongly support	Because we need a jetty and the concept design seems to accommodate enough old and the new features	Just memories. Not special memories.	That it is suitable for locals and tourists alike.
Strongly support			
Strongly support	The design looks fantastic, let's proceed		
Strongly support	Anything is better than nothing, looks grand	No answer	No answer

Strongly support	Budget seems appropriate, lots of recognition of old jetty.	no. I am not emotionally attached to the jetty. I have enjoyed being on it with my children, but understand it needs to go.	
Strongly support	A bit for everyone and we are getting a jetty	No answer	No answer
Strongly support	Its time to stop bickering and start rebuilding. Let's get the rebuild started. It's affordable. It's doable.		
Strongly support	Got everything A bit of the old New Covers fishing, diving	Beryl's and Sammy the seal	Everything covered in concept design
Strongly support	It recognises the heritage of the jetty and provides a great recreational facility	No	N/a. Just build it
Strongly support	Badly needs jetty (tourism), film industry	No answer	Lighting on all night. Web cams
Strongly support	I think the design is user friendly an issue that caused some of the anxiety over the concept design previously displayed. It also reflects the heritage well.	No I only walked on the Jetty once before it was closed.	Rod holders. Seating
Strongly support	I believe it is a good compromise, it uses the old and includes the new. It has the history embedded.		Make sure there is enough space to sit and fish and watch the water while letting others walk by and enjoy the surroundings
Strongly support	Esperance needs to encourage tourists to return to our beautiful town. A new Jetty is a step in the right direction.	The senior citizens who have lived their entire lives fishing from the Jetty should be the focal point of the interpretation areas.	Life rings, seating and the dive platform all make the new Jetty concept appealing. A fish cleaning area/table similar to the previous one and good lighting for night walks and fishing.
Strongly support	No answer	Some sort of information about how the jetty was used during world war 2	V
Strongly support	Need to move on - the time has come	Fishing with my kids	Shelter at the end. Small boat access maybe
Strongly support	Should have been done years ago. Would have been using a new jetty by now	Sammy the seal.	Advertise the Friendi cowrie which lives on the artificial reef along from the end of the jetty. The concrete parts of the structure need to be made of a saltwater mix which will give it a much longer life. Check out the Dutch concrete structure which are guaranteed to last for 200 years
Strongly support	The design looks really good	No answer	No answer
Strongly support	Just love the design.congratulations shire on your choice.	No what ever you decision i will be happy with.	Just as long as i can ride my gopher along it.
Strongly support	Good for the town, nice to have a jetty back.	No not really, i think the concept is great as it is.	Easy for people with disabilities, in wheel chairs and mobility scooters to access and use to its full extent.
Strongly support	We need a jetty, the design put forward I think covers what most people want. Please don't let it be drawn out like the Busselton jetty.	No answer	No answer
Strongly support	If it meets the Australian standards, do it	Use to run Lions fishing clinics. choose to retire here because of the amenity	Handrails, safety equipment.
Strongly support	It needs to be done	It's my childhood there, caught my first fish and squid	Lower plat form
Strongly support	As much as i would love to see the old jetty stay i understand that nothing last forever. Having a jetty with both new and old features is great		
Strongly support	Love the dive board. The historical part. And excited to have a jetty we can use again		Esperance has a big diving community and it's something for tourists too. So, the dive board is great. I dont know how you could improve, but maybe something that allows for dive tours in the future.
Strongly support			
Strongly support			
Strongly support			

Strongly support	Would love to have a jetty again.	My Grandma teaching day how to fish 🐟	Fish cleaning and big enough to ride our bikes down.
Strongly support	The old one is broken, the new concept looks great		
Strongly support	I want a new jetty so we can get lots of tourist visit	It is good for tourist and has lights so if people want to walk on the jetty at night. Cool entrance and clean and popular	What type of material they use to make the jetty
Strongly support	It looks like a traditional jetty that was there.	No	Allow access to sit along the edge and fish.
Strongly support	i do feel it has a lot of history with the old one but the new one will be safer and by the looks of it more attractive	not really but the one time we saw a whale off the jetty and it was looking straight up at the fishers it was special moment	the design right now is very smart
Strongly support	meh	no	
Strongly support	because the jetty has one of the best fishing spot.The diving is also good idea because when you come into town you can also straight go they instead of the whale tail.	walking around with friends and family and pretending to push them into the water.Also when I first caught my squid and herings.	it is in a good spot
Strongly support	I just like it and want a new jetty		
Strongly support	I like this design because it has something for everyone. The length of the jetty is great too.		A board to tell us fish and marine life and what the size limit should be.
Strongly support		having long walks with friends and family and portending to throw each other of the jetty	i think you have space for people to fish, walk and also jump on the jetty and dive
Strongly support			
Strongly support	because i have had good memories on the jetty	yes i do with friends and family	
Strongly support	It will bring tourists back	no	no i like it
Strongly support			
Strongly support	Just think it's the best cost effective option		
Strongly support			
Strongly support	Because it looks good		
Strongly support	I think it mixes old and new very well, I'm just really happy the shire isn't letting it go to rack and ruin anymore. Just make sure we're not too much like Busselton	Beryl's food van was a classic! Sammy the seal?	Can there be spots where the balustrades are not there, so that people can sit on the edge of the jetty and fish like old times?
Strongly support			
Strongly support	I like the concept of retaining some heritage style in a contemporary new structure. Also just want it built!		
Strongly support	It successfully illustrates how the old jetty was used and enjoyed by residence back in the day		
Strongly support	Because it's time to make a decision , concept looks great, let's move forward.		Perhaps some benches to sit on whilst fishing and the observer
Strongly support	It looks good and esprance needs it		
Strongly support	I just want it done!	Fishing and bike riding on the jetty as a children. Walking along it on a warm summer's night	Wheelchair access of course. Seating. Longevity! Good lighting.
Strongly support	We would like a new jetty!		
Strongly support	The proposed design is multifunctional and will allow residents / visitors to both visit and engage with the jetty as a recreational structure.		
Strongly support	Looks good and it's affordable		
Strongly support	The jetty is close to the original style and design and is suitable for fishing from.	I used to live in Esperance in the early 90's and spent most of my time from the age of 9-13 on that jetty fishing if I wasn't at school.	Fishing from the jetty would be the main consideration as the old jetty was very busy with people doing just that. Scuba diving or snorkeling at the end would be great so the lower platform would be great for that.

Strongly support	Looks better than the previous concept that somewhat resembled a floating whale carcass with the rib bones showing.....needs to resemble the original Jetty as much as possible	The original length and purpose and recreational fishing hub it became from children through to retirees and travellers. Don't forget 'Sammy' the seal!	Plenty of width where possible is key, nobody likes a fishing hook in the ear while trying to walk past a kid learning to fish.....
Strongly support	I think it meets all the needs of the community and we can afford it	No	Lots of seating
Strongly support	I think we should just get on with it and it looks functional, the reference to the old jetty looks good. We'd all love a copy of the old one but that just isn't practical.	Squid ink on the old weathered wood	
Strongly support	The design incorporates so many features relevant to Esperance people - the space for fishing, diving platform and the history as well. I believe this jetty will be unique and will attract tourists and locals as well. And it looks great!!	Nope, it's all there!	I believe all the necessary things have already been incorporated into the design. It could possibly do without the railing on one side, or perhaps have gaps in the railing, for people fishing, but otherwise it's great!
Strongly support		Sammy the Seal obviously :)	Be conscious of bird roosting points. Make sure that they are reduced so sitting on the jetty to fish isn't disgusting.
Strongly support	It covers a variety of users	No	Resting benches at intervals for elderly to stop to catch their breath.
Strongly support	Important to have a jetty for the community, love what i have seen so far.	No	Easy to access lower ramps.
Strongly support	The cost of build and long term maintenance must be realistic and attainable. A replacement will be cheaper than a refurbishment and meet community needs	A glass wall at the end with a photo or sketch of the remainder of the jetty etched in to picture what was there originally	Detail the proposed maintenance costs and how they would be funded. Would you be allowed to pull a boat up to the diving platform?
Strongly support			
Strongly support	Because it looks great, practical and has something g for everyone. We just want a jetty that we can enjoy again	I think they've covered all of them	Definitely keeping the old jetty design and length in mind and that it is accessible for everyone, fishing and diving design is great
Strongly support	Looks good.	Fishing with my friends in the 70's with my mates. Diving in the 80's with my fiance.	Good coffee, clean toilets and plenty of parking.
Strongly support			
Strongly support	Retain history and reconstruct. This concept will cost 10m in the end.	No good	no good
Strongly support	Something for everyone, great mix of features. Good low maintenance. Something new for the future		Rod holders built in Some form of sea through section - a window into the under sea world A photo opportunity maybe a frame out of old timber at the end positioned in a place that will attract photography
Strongly support	I feel the Shire have put in a lot of effort to come up with a design that will suit the town		Happy with what shire decides
Strongly support	Would just like to have a replacement Jetty for our community to use.	I'm happy that if some of the timbers can be incorporated into the design re seating. Sammy the seal monument	I think in the concept design it has been covered with the under jetty diving platform and the fish cleaning facility
Strongly support	I firstly love the fact the Jetty is being replaced. This is a monumental asset to Esperance and a massive tourist drawcard. I love the design and how it accomodates lots of recreation activities	We loved seeing Sammy the seal when we walked the jetty. he was cheeky and a lovely fella. Would love a reference to him.	lots of areas for people to sit and eat or read and relax. Areas covered with shade sails would be awesome. would love a coffee/burger stand at the end(out on the water) with lots of seating. You could even have a busking/entertainment area. Would be beautiful in summer to sit and relax with a coffee and listen to some greta local entertainment. Make sure that it is wheelchair and pram friendly.

Strongly support	Looks fantastic, incorporates old jetty features and heritage yet is functional for community.	Walking on jetty with family and fishing	
Strongly support			
Strongly support	I think it includes something for everyone, embraces the history but also looks to the future	No answer	Try to use more wood where possible to add to the aesthetics of the structure
Strongly support	Design takes in everybody's needs , captures the history, maintains width and curve and I particularly like the wide end section	Highlight historical pictures of the original jetty. Include some way of seeing how it was once. Took my children there fishing and I would love to be able to take my grandchildren fishing on the new jetty	I would be willing to reduce or remove the historic section if it meant we could lengthen the total jetty. Definitely want the widened head end. Addition of a drinking fountain might be good. Wind shelters along the way
Strongly support	I strongly believe that we have to move on and replace the jetty which cannot be repaired. The one and only solution is out with the old and in with the new!!!!	Always liked the long length of the jetty with the curve at the end of the jetty.	I think the present design covers all of these activities
Strongly support	Needs replacing. New concept looks great.	The original yacht club which was based at the jetty. Small boats like the moth were the boats that were used. This ws prior to the building which is where the Port Authority is now.	No answer
Strongly support	LOVE the new plans	Walking to the end sitting down to look for dolphins	More seats needed
Strongly support	Caters for many different uses and acknowledges the history and importance of the jetty it is replacing.	Examples of the sorts of goods which were unloaded at the jetty when used for shipping, perhaps include an old or replica mooring post.	
Strongly support			
Strongly support	It appears to be a good compromise. We need something to be decided on and constructed so people can stop arguing and the community can come together again and stop being divided.	No	My only concern is having a wooden balustrade on one side and steel on the other. Maybe it would look better with steel on the modern part and timber on the historic section on both sides.
Strongly support	It's time to make the decision. Let's spend more time on the solution and not the problem. Looks aesthetically pleasing strong structure	Fishing. Diving. Evening walks, wind, rain, hail, shine. Meeting many visitors	Where possible use some of the old timbers
Strongly support			The jetty needs a coffee shop / cafe / restaurant built on its deck
Strongly support	It recognises and acknowledges the history of the jetty while providing a replacement community facility and icon for the continuing amenity and benefit of a functional recreational asset for the Esperance community at a realistic and affordable cost.	No.	The concept design seems to cove most requirements. Access for people with limited mobility should be a priority. The rail lines should be usable by a light railway system.
Strongly support	It will be sad to see the old jetty go but if a few bits are going to be retained I will agree. Something has to be done as this looks teh best so far	Just to please remember all the people it has affected. People in town who used it years ago and now. Far and wide, east and west. Loved walking along the jetty after work to wind down, especially in the summer. Nice to see so many happy tourists enjoy our jetty	I think with this design the council has covered most things. A beautiful place for marriages and social gatherings. Just make it safe.
Strongly support	All I want is a jetty to talk out over the bay and perhaps put a line in	No	I thought the plan very complete
Strongly support	Beautiful and practical	Fishing from lower deck at the end of the jetty. Swimming from jetty to Taylor street jetty	Glass view plate
Strongly support	No answer	No answer	No answer
Strongly support	It has been well thought out and consequently drawn up and illustrated for the public's perusal	No	I shall leave that up to competent councilors to decide on that
Strongly support	Well it is missed by all and the visitors come here for it	Fishing, diving, walking on it. Ride my bike all the way	Yes, just get on with it before we all die

Strongly support	the jetty has been an icon of Esperance for many years for sight seeing, fishing, diving and many more activities.	No the 10 concepts the shire have are adequate	No, looks good. Need hand rails and maybe no slip surface - when raining is very slippery
Support	i feel although the jetty should be the same length as the old one, although i am happy that a replacement is being done.	fishing and swimming	
Support	Looks quite good, well thought out	Beryls Van!!	Lighting system for night light shows
Support	looks good	My dad, my sister, my uncle and I were gutting fish on the jetty and a big rompa shark showed up	Jetty jumping areas
Support			
Support	i feel the new jetty will be a good representation of the old jetty and will be able to relive the great memories for years to come.	i used to go fishing there quite often and was apart of my upbringing by my father	make it as similar as possible to the old jetty, with additional parts like diving platforms for divers
Support		I remember fishing on the jetty and catching squid	Jetty time line
Support	coz	fishing`	diving platforms
Support	because i feel we need a new jetty as the old one was used alot	no	
Support	i support it but i believe that they should have fixed it when it first started falling apart because then they wouldn't have to spend all this money on a completely new one	my dad, my brother and i used to all go out to the jetty at night time to go fishing and we would have the best time. i also miss seeing sammy the seal because he was the best!	i think that they should make the jetty like the Busselton jetty or like Hillarys boat harbor in Perth
Support	Because we need a jetty	Going fishing on it	that it is accessible to everyone even if the are in wheelchairs
Support	I feel like the new jetty will be entertaining for all people of Esperance amd tourists.	Me and my mates would always go fishing off the jetty amd had a great time	They need to add filleting boards and somewhere to wash your gear.
Support	A good mix of heritage and madern design. Building is a reasonable size sith the option of extending at a later date		More drink and food vans available from early morning to evening so that area can be utilized
Support	Only reason I don't 'strongly support', is that it is shorter than original. Looks great though! 🐼		
Support	everything thats needed is there		
Support			
Support			
Support	Similar looking structurally from a visual stand point and looks to be functional for recreational activities.		Consoderation for a designated squidding area that either has a protected deck or something that wont end up with squid ink staining concrete deck.
Support			
Support	It's boring. Boring boring boring. There is NOTHING about this design that is uniquely Esperance. We have a once in a lifetime chance to produce an imaginative and functional work of art, and THIS is the best we can do? It's a plain, featureless fishing trestle, designed as a token nod to the staid tired old Save the Jetty wallies.	No.	Come up with an imaginative design. A five year old could have designed this. It's nothing.
Support	It is a nice acknowledgement of the past, put also has been designed with future maintenance and life span in mind.	Not really.	
Support	New design covers majority of people's needs - local and tourism. Maybe a small cafe located somewhere on the jetty as well.		Definitely accomodate for diving and fishing etc.
Support		Loads of family walks, chats with the fishermen, squidding, and just enjoying the view back to the shore	Great side railings to protect all for- the days when the wind is a little more intense but you don't take it until out further
Support	Looks like everyone and every base has been covered. I'd still like to see a working jetty that cruise ships can use	Nope	Love the swimming dock area!
Support	The history of the old jetty being used in the ways that it is, it's very well thought out.		

Support	Feel it allows for opportunities such as fishing, walking, photography	No answer	Holders for fishing poles. Seating along jetty, spacing for people needing to stop and sit often (disability access). I see plans for seating but it looks quite low, can be difficult to sit and stand from low seating.
Support	I like that they have kept the design similar to the original jetty but feel like the new design doesn't have any distinguishing features to make it unique	The ever present Sammy and friends waiting for fish scraps	Maybe gated areas for fishing to allow segregation for fishing buckets and knives for families walking along and also more child friendly
Support			
Support	As long as the rates aren't increased again to fund it, the design is great.	Sammy the seal	
Support			
Support	I feel this way because it's exciting to see something happening. It's been horrible not being able to use the jetty	I loved the fishing wash down bench with the hose! Please replace it with a new one!	Have rails but also gaps within the rails to accommodate for fishing. Like how the old jetty's rails were
Support			
Support	I support the designs and I think they're great, however I would've liked to have seen a head land/jetty with restaurants or attractions built for the future generations that could also have fishing etc off.	No	For diving a netted area would be ideal, similar to the Busselton Jetty so people can dive safely. I know myself if people are fishing I would not like to be swimming/diving out that far.
Support	Will be good to have a jetty for families to take your kids to and fish off	Fishing of the end of the jetty as a family	Maybe some form of rod holders for fishing rods so there not laying across the jetty in people walk way
Support			
Support			
Support	We need some kind of feature Jetty to replace the existing, the design incorporates tourism, historical factors and recreational.	Just growing up in Esperance, walking the jetty with my family on warm summer nights. With a food van at the headland.	None
Support			
Support	I think the community wants a new jetty but honestly I have lived here for 20 years and only been on it a handful of times.	Not Particularly only ever went on the jetty for a quick fish.	Accessibility for all ages and groups of people
Support		I think Beryls Eats should be featured!	Timber should be used for detailing along the whole length, not just the beginning. To keep it as traditional looking as possible. The structure/design should allow for an underwater observatory to be constructed at the end (at a later date if funding is to become available).
Support	I accept the fact that the new design needs to be slightly smaller.	The Jetty is important as it is the main attraction for tourists and locals. I used it for fishing and miss it dearly. I would love to teach my daughter how to fish too. I also think that the Jetty is central to bringing custom back to the food vans.	Fish cleaning areas are important and seating along the jetty too.
Support	I like the multi use ideas incorporated.		

Support			The original dive trail needs to be well within reach & safe return of the dive platform. I believe the end of the development should avail itself to be able to be connected onto to possibly extend the length if a future opportunity arises.
Support	It seems to meet the standards that the residents want		
Support	Seems like a good way to keep most people happy	No	Fish cleaning table
Support			
Support		It should have my dad's blood on the wood cos my dad slipped on the jetties wooden platform and died lol rip	It should have like food stands and an animal cage area and a water slide
Support			
Support	Esperance has been too long without a usable Jetty, I think having the three different sections has something to appeal to everyone (well almost everyone) and will be more usable,		Maybe incorporate as much salvageable timber from the original Jetty into walkways, and maybe an artificial reef of some kind a bit further off the Jetty for divers to look at rather than snorkelling through fishing lines
Support	it is about time something was done. also shame on the past shire councils for letting it get to this point	fishing swimming and diving from the original jetty	to keep as much of the original jetty as they can
Support			Good fish cleaning tables with wash down facilities.
Support			I would like it to be the same length as the existing structure
Support			
Support	Because they are adequate dimensions and designed respectfully of the original		
Support	Looks like a viable replacement		Some barriers from the prevailing wind side (west) would seem to be a practical addition which would make using the jetty more enjoyable on windy days. They could also be decorative and perhaps display some of the heritage information.
Support	Just want a jetty so we can fish of it. The old timber jetty was good in its day; however we should be looking at more modern materials	Fishing	Sensor lights, cleaning stations and rails on both sides for safety
Support	We just want a jetty that is functional and looks similar to the one falling down		
Support	I like the new design	Nothing in particular	
Support	It's great to see the design is a similar width to the existing jetty. (The first design I saw with large overhead steel beams was so bad!). A lot of thought has gone into this new design. Well done.	As a child we spent many days on the jetty and it was great my son could have the same experience. During the holidays he would get up early, pack his fishing cart attached to his bike and head to the jetty where he would spend all day catching fish and squid to then come home and cook up a storm. (Nothing beats fresh squid). At lunch time I would head down to check on him and the smile on his face said it all. The jetty has always been a safe place our adventurous kids can learn so many skills. It's in a great location and easily accessible, it's great they can ride their bikes to carry all their fishing gear, it's all part of living in Esperance.	Please DON'T put restrictions on the new jetty - such as no dogs, no bikes!! We are lucky to have such a wide jetty and kids love being able to ride their bikes towing their fishing carts and people love taking their dogs for a stroll along the jetty. Please don't compare our jetty to other jetties (like Busselton jetty). I've been to the Busselton jetty and it's so commercialised and doesn't have that same relaxed feel as our jetty. The lower platform is a great idea.

Support			
Support	We are in need of a new jetty.. and this one is way better than the one we have :-)	No	Appropriate safety equipment positioned along the jetty.
Support	Looks traditional... in keeping with the old jetty.		
Support	It looks like the original without needing anything fancy	Taking my children out on their bikes and going squidding.	Having it as a recognized dive site would be great for tourism. Being able to fish anywhere along the jetty
Support			
Support	Whilst it is an updated version of the jetty it still has the same feel and look of the old one	No answer	No answer
Support			
Support	just missed spending family leisure time there, one of our fav thing to do since we arrived here in Esperance.		
Support	Replaces an Esperance icon with multigenerational recreational and cultural benefits for our town.		Maintenance schedule and costs
Support	I would like to get on with a replacement rather than this limbo!	No, I just like a functional jetty we can all use.	Concept is fine.
Support	IF you actually do something		Wheelchair access/support
Support	still looks like the old jetty so retains the feel. Would be better if it was the same length.	a giant squid	coffee shop
Support	It is the best design that copies the original jetty presented to date and will function as required. I would prefer it to be 500m rather than 400m, otherwise looks good.	history of it being built and its use over the years, also the impact it had to open up the region	nothing to add
Support	No answer	No answer	Would like to see a T piece on the end of the jetty
Support	Like the design, but would like it to be longer. Perhaps extend by adding 200m of groin to the headland, then build the jetty.		Would like large cleaning table with salt water deck wash. One diving platform and one fishing landing would be good.
Support	Better than the last pityful attempt	Push the boss off the very end, well past the concept length	Railings on both sides makes fishing difficult and encourages people to climb over and/or jump from
Support	I think the design is well thought out in terms of retaining the heritage and social values of the old jetty, whilst using contemporary design.	There may be some scope to recognise the jetty in terms of how it was the separation point for aboriginal people in terms of entering the town centre.	Highly recommend another platform midway for the fishing / swimming diving activities. Opportunity for boats to tender along side. More than one fish cleaning station. Plenty of seating and shelters. Seats to fish from instead of having to bend right down to sit on jetty (particular for the elderly). Access to drive small vehicle to transport dive gear to end of jetty.
Support		Most of the Jetty was free of railing on on side..preferred. Would like to see shops and eateries. Should incorporate another small marine harbour which helps to prevent erosion of coast together with submerged reef to prevent further wasted money.	
Support	Im in tourism and we need to move forward	No	Water taps along the length of the Jetty
Support			
Support	We need a jetty	No	Yes probably but I like the design
Support	Although it's not as long as the original it looks good	Fishing off the jetty before it closed & Sammy the Seal	Facilities to allow people to buy food or drinks on the jetty
Support	It appears everything needed has be included in the design.	no	Fish cleaning area
Support			
Support	It's the best if old and new		

Support	I like the dive platform, the fishing area and the length.	Fishing with the little kids, one in the pram making a huge mess of fishing line entangling himself arms and legs all kicking.	Have little bolted rings in the edges to tie dogs and kids onto when you want to stop and sit or fish for a while.
Support		Visiting Esperance for the first time and walking/fishing along the jetty. looking out to lucky bay/ Frenchman's Peak and Woody Island Swimming through the jetty for the Australia Day swim thru	shelters along the jetty perhaps with historical photographs included (similar to toilets along the foreshore) fish cleaning station historical points of interest and species of birds/ fish which may be found near the jetty snorkeling trail as much original timber from the existing jetty to be used!! a public piece of art perhaps at the end of the jetty (diver or fisherman)
Support	Can one section part be strengthened glass so you can look at the water below? I know they do this type of bridge work in China and it is really great. I like your idea of having something that tells the story of the first jetty and how it was made	No I don't sorry.	I would like one section to be of strengthened glass so you can see the water below. China has built bridges out of strengthened glass and they are really great. It showcases the environment and is a fantastic concept and brings in tourism. It would be great to view the water and fish below just by walking on the section of strengthened glass bridge.
Support		No	Seating ++, art and sculpture, history journey, swimming ramp?
Support			
Support	We need a jetty	Not really	Seats Lights Place to fish and clean fish Tourism features like the recent foreshore ones
Support	Having a jetty of any sort that can be used is important		Easy for everyone to use, for walking, fishing, diving, swimming, just leisure
Support	we simply need a jetty, get on with it please.	not really	definitely access. Tourism feature, include some fact sheets and information about the jetty and it's history places to access for fishing, as well as supports like fresh water and the table for gutting and cleaning the fish caught. seating out on the jetty lighting on the jetty safety rails for extra peace of mind for parents.
Support	Looks good, seems to cover the needs of lots of different users.		
Support		Wedding photos taken on and under the jetty	Easy access for all Accessible to fishing and diving Safe
Support		fishing	it needs to be 150 mtrs longer
Support	It looks great and is very much a usable jetty	Fishing. Walking	No answer
Support	Looks good, seems to fit the brief. Doesn't remind me of women's sanitary goods.	Long walks & fishing late at night.	Nothing.
Support	It is more like the original jetty and is more practical for fishing and diving	Memories of fishing with Dad as a child, walking/bike riding the full length and then snorkelling down the bottom platform on calm days	Put cross bars all the way along like in pic A which will make it look like the original, lighting on the jetty so you can dish at night
Support			
Support		grow up on the jetty	this new jetty needs to be at least 500 mtrs long

Support	Design incorporates historic look of the jetty - only misgiving is that the jetty is not as long as the old jetty	No	I am more than happy with the concept design that has been put forward. It strikes a good balance on accessibility and capturing the historic look of the tanker jetty. The length just needs to be increased to match that of the existing jetty.
Support	It shows the spirit of the old tanker jetty.its not an ultra modern concept which would look out of place.		The old jetty was a place for scuba divers ,fishermen ,and a place to go to be on the water for stress relief.sometimes it's nice to go out on to it on a storm just to let the s..t off life blow away. Perhaps consider these things in your planing.
Support			
Support	I think at the end of the day most people just want a usable jetty		
Support	Love the timber deck section and we all miss our jetty. When can we start building it	Diving fishing sailing around it walking the length of it and photographing it over the 44 years I have lived in Esperance	Are the underwater sections of the pylons staying with all the sea life on them??
Support		Fishing and walking the full length of the jetty	Use as much of the old timber as possible, may be a section of the old jetty left in the new one
Support	We definitely need something for the Older people of town to go and Fish, and it keeps them Active, and interested in Life		
Support			
Support			I think we need to build it 150mtrs longer
Support	If the premiss is to demolish the existing then this is the best alternative		If this design goes ahead then a swimming platform needs to be installed at the beach end
Support			Still think a plan should include future cruise ship Birth facility .
Support	No answer	No answer	Shade shelters for fishing area
Support	It is good to be going forward and get over this stalemate. We all have our ideal but make it financially achievable in the immediate future and reference the historic cultural importance in as many ways as aesthetically possible. I would like to see an additional lower level caged swimming area so people and particularly children and teenagers can activate the space as a place to jetty jump etc. Make it long enough to encourage the more wary lap swimmers. Streaky bay has a similar set up. Put shelters on them that are made as quadrants and that way you can sit out of the wind from every angle and further enjoy being out on the jetty in all conditions - happy to share design idea of these with designers... PS you will never please everyone - just make it happen!		designed multipurpose useful shelters from every wind direction - can discuss idea with architects lower swimming platform and caged lap swim etc for jetty jumping and safe swimming

Support	Do I have a choice, ideally I would Like the old jetty restored, but accept we are going to have a new one. Rather than demolish the old jetty I would like to see it rot slowly, until we are only left with bits like the pieces at Castletown. As like many I am concerned about the damage to the sea life which has made the underwater jetty home for the past hundred years. I feel lthat are no different to the loggers that just clear the rainforest in Indonesia in parts. There has only been minimal discussion about the below sea life, everybody is focusing on the bits they can see and how we can inject money into the community.	My recollection is attending one of the many meetings about the jetty at the Civic Centre and the majority of the people concerned about the destruction of the jetty were the elders in our community. My thoughts were where are the younger people in the community, it is all oldies lobbying to save the jetty. They feel passionate about this jetty as their fathers and grandfathers may have worked, repaired or help build the jetty, plus it was their playground growing up in Esperance. I was so proud of these people as they decided to pick up the baton and fight for this dear old girl.(jetty I mean). Years ago when I moved to town, I even remember Barry Stearne forming a committee to start looking after the jetty as they could see that it was not being cared for the way it should have. How proud I am of the elders in our community who tried desperately to save our old jetty. This should be acknowledged in a very positive way. I hate this constant negative talk of the jetty dividing our community. I never saw it as a division, it was just all sorts of people with different opinions about our jetty, but it was mainly the elders in our community who should have been enjoying their retirement who took up the baton to save our jetty, had meetings initiated discussion etc. This recollection is well worth preserving	More wood, less concrete, more length
Support	At least it is a move in the right direction. The idea of saving the old jetty has been left far too late so we need to do something. I do feel that the jetty needs to be 100 metres longer than the plan.	I have very special memories of diving under the jetty. I was involved in building the artificial reef. It would be nice to have some under water shots to showcase some of the marine life that exists or at least did exist.	Definitely wheelchair and go-far friendly. Lots of places to sit and an open staircase (not a ladder) that goes into the water so that divers can easily come out of the water.
Support	I like the reference to the original Jetty with the historic component and the reference to rail tracks, but like also that it is practical for fishing and other recreational activities.	Nothing additional	Some seating at various positions. I would love to see an ocean pool in Esperance, if not at the Jetty then somewhere near to Andrew or James St.
Support	Still want the jetty to exist	Fishing with children. Riding bike, walking along the jetty. Coffee on Sunday morning	Diving platform good. No to overload with commercial businesses. Relaxed seating as enjoyed previously
Support	You are honoring the past with the wood decking giving the length and being able to maintain the new jetty	Walking along the length of the jetty. Glad you are making it long with possibility of making it longer	Displaying and keeping as much history that is possible and affordable. Great idea of shops at the end
Support	Looks like a good compromise		
Support	It seems to cover most of the requirements		I noticed that use for cruise ships was in the list if desired outcomes but couldn't see anything about that in the draft concept drawings
Support	I think it will cater to a diversity of users.	I used to enjoy walking on it and watching other users, especially the young fishermen	

Support	It looks good and we just need to get this done	Lots of great memories fishing with my Dad and then my kids fishing from here. Just enjoying walks along the jetty were special. I am glad the new one isn't too short	I just hope the lighting is good and the jetty hopefully can't be easily vandalised
Support			
Support	We need a jetty, but make it longer in the middle section		Maybe more benches
Support	I support the concept as I am sick of seeing our beloved Jetty rotting away into the ocean. I miss going for a walk out there & having a fish	It's always good to keep a record of our history	I used to walk with elderly people on the Jetty, there needs to be seating along the length so you can stop and rest
Support	It is only 400m long, should be longer. Use some of the original wood for the first section near the headland. At least preserving some of the old jetty. Just get on with reconstruction		Is there lights for night fishing
Support	It seems to cover most of the concerns of the community. I would've liked it to be 100m longer and there has been an opportunity lost for a facility for small boats to tie up to for recreation. However this is quite an acceptable draft.		A lower level small boat mooring facility.
Support	It looks reasonable and better than nothing	Nothing special but who doesn't love walking out on a jetty. Never been to a town with a jetty and NOT walked on it to the end.	Maybe a fishing platform closer to the water accessed by steps maybe halfway out the length. As well as fishing from the top. Flensing deck like on the old jetty design.
Support	We need a jetty, the longer this goes on the less chance there is that I will see another jetty in Esperance	No answer	More attractive, current plans look very clinical
Support	It incorporates timber in first 75m in an historically aesthetic way. It looks strong, durable and able to be more easily maintained. The length of the jetty though not ideally as long is adequate. Looks good. A few extra touches with timber seating would be great	No - Sammy the seal was always a favourite	Recycled, comfortable wooden seating, some with windbreaks. Fish and chip shop on headland area with some souvenirs for sale. Lighting that has more of a heritage look, more detail on them, not just plain posts and round lights
Support	Looks okay, it is better than nothing at all	The interpretive rail inlay is worthless and could result in premature deterioration of the deck. Historic section A should provide effective exclusion of feral pigeons, i.e. nesting sites and roosting areas	The dive platform is good. Bus shelter type wind break and seating on the jetty head. Provision of rubbish bins, fish cleaning table, life saving rings
Support	because it should be replaced making sure that it doesnt look retarded as it looks now	absouloutely nuthin	nnnnnnnnnaaaaaaaahhhhhhhhhhhhhhh
Support	The old jetty is a safety hazard and needs to be removed ASAP	No answer	Maybe provide access for the transfer boats when cruise vessels visit port instead of current transfers at Taylor Street
Support	It will be good to get on with putting a replacement jetty in place as we have procrastinated for far too long already.	I have lived in Esperance since 1965 and whilst not a fisherman I enjoyed the opportunity to walk along the jetty and feel the breeze in my face. Watching the trains travel the jetty and the fuel boats moored alongside are enduring memories.	It would be great to see a new jetty be a similar length to the original but I am also aware that costs to the ratepayers and community are major factors influencing any decisions.
Support	only because Id like to have seen old jetty kept in good repair	I worked as a wharfie a couple of times, the ships used to tie up at the jetty for us to clean out & fumigate, but most memories are of fishing with the kids	That all looks to be covered
Support	Town needs a jetty, part of Esperance history, and longer, will steel and concrete last 80 years plus	No answer	No answer
Support	We need a jetty		Easy for people to use
Support	Without being spectacular it looks strong and reasonably aesthetic. It should create its own reputation as a tourist drawcard as well as fill a good recreational purpose	No, apart from taking my young son (now 4)) fishing on the old jetty	Nothing, let these things evolve

Support	This jetty should be the full length of the old jetty we are building something for 2060 not 2018 for forward Esperance growth. I would support that the tourist office be brought to the headland as a first contact for tourist into town, also a charge for going onto the jetty small but a charge eg \$1 or \$2 dollar per person or \$25 per year to help with upkeep and long term replacement. A small railway track build into the beck not a trip hassed so as miny trains can run up and down when cruise ship drop passage of by tender at the end.	In the 1990 will manager a motel near by this old jetty had people fishing about 1 metre apart all the way from about 30 metre from the headland to the end. Cars were parked in both car parks and on the Esplanade to ocean Blues and up Belfour st during the Xmas and Easter Holidays. So more length on the jetty is required if it to cater to 2060+.	
Support	Can't see why three design when historic plan looks great all way also led lights full length	Early pioneers who used it to work and fish	Seats could be donated by family have name on seat
Support			
Support	I feel the design has tried to incorporate the history of the old jetty. However I believe the old Jetty should be refurbished.	The exporting of bagged wheat from the Jetty . My father was one of the workers doing this work.	Jetty needs to be commercialised to create an income. Should incorporate an underwater viewing platform. A kiosk ,manned by volunteers between 8.00 am and 5.00 pm to collect fees
Support			i would prefer a longer jetty if finance allow even if the extension beyond the proposed lenth is narrower.
Support	Design seems a reasonable compromise. Modern materials, lower maintainance, hopefully longer life, somewhere for retirees and others to find a satisfying and healthy recreation that adds to their welfare and diet, and a touch of the old structure to keep in touch with the past.	My first cigarette on the beach under the jetty when I was about ten. The brand was "Turf", and that was a good description of the taste! Boarding ships tied up at the jetty and scoring a feed from the galley on one occasion. Not sure you would want to showcase these though.	
Support	The Jetty needs to be replaced! It has been for many years an icon of Esperance.	Many nights spent walking along the jetty, socializing with young and old fishing.	I don't believe he use of parts of the old jetty would be of any used. The question of heritage should not be considered as the old timber is now in a very poor condition and serves not perpose.
Support			
Support	The concept is easily usable for fishing and diving by locals and tourists	No	Items all covered
Support	The design of the jetty ticks all the boxes for me and time has come to move forward	Have recollections of plenty of fishing off the old jetty as long as there will be enough space to accommodate all the fishers	It needs to be attractive for people to be able to walk the length as was so popular before
Support	You did a great job on the foreshore, the jety at the moment is like a broken branch on a tree - get it done	I miss the jetty very much, spent a lot of time there. Great for tourists, families and kids	I would like a full length jetty but will settle for what we get. I think you should make provision for service vehicles and ambulances to be able to turn around when ever the need arises or reverse all the way back
Support	The old jetty has had it. The town needs a jetty, it is great for fishing, walking and tourism	I feel the inlaid steel track to interpret the original railway is a folly and a waste of money. We all know what a railway track looks like and it will be shown on the proposed illustrations	Materials and their ability to withstand the elements is most critical. Let's hope it lasts as long as the old jetty.
Support	I support general design except a need is required on fishing section to allow for all weather condition	No answer	There should be a T section on end of jetty to cater for fishing public to give them better access to all wind conditions

Support	It needs to be done and looks similar than before	Would be lovely if there is a place at the end for even small ships to tie up for a little while	Is there other materials say rather than stainless steel or high grade plastics which should be used for long life
Support	In the event that the jetty is to be replaced then this has some of the requirements to make it acceptable. My first preference has always been to maintain'keep the old jetty, sadly the shire has opposed this since day 1.	Many happy times herring fishing off the jetty with family and meeting the many and varied visitors to the town from around Australia and the world while doing so	Of the 250m fishing jetty I strongly recommend that at least 350m access to the jetty edge and this should be at least 1.5 metres wide. For example 175m x 1.5m each side, or better still 200m x 1.5m on the north side and all the 250m fully open on the south side. Also there must be a fish cleaning statin at least 5m with fresh water available
Support	It acknowledges what the old jetty is but is more cost effective than restoration	Enjoyed walking the length of it	No answer
Support	An acceptable compromise for accepting a plan for the jetty replacement	A showcase of the jetty's history	Walking
Support	Support	Great memories	
Support	Esperance needs a jetty. This design meets all needs and also allows for ongoing maintenance in the future.	I have lived in Esperance for 58 years and have many happy memories of the jetty. It has always had a huge significance to the history of Esperance.	I think user accessibility for everyone is paramount
Support	No answer	No answer	No answer
Support	We need a jetty	No answer	We would like to see tourist boats come and berth at this jetty. The end of the jetty should be strongly built and well lit for this to happen. Have tourists arrive away from wharf and industrial activities. This will boost our town and make it more user friendly. It can be done!
Support	Because we need a net jetty and this looks similar to the old one with some added extras	No answer	Need some rils on the diving platform for security. Just for holding onto for balance
Support	On paper, looks close to meeting needs of local requests, as well as providing attractions to our declining number of once regular visitors. The new /virginal grey nomads visiting our town remain disappointed to see this icon looking neglected..Therefore action is required swiftly	Yes;visiting a submarine @ end of the jetty Teenage sons fishing/squidding @ early hours of the morning. Learning independence Further information & education of fishing by Lions Club Photography projects capturing town and yachting in appropriate season History of what role rail played Oil&fuel discharge to depot	Any indication of water depth and have relevant signage. Encouragement for scuba diving, using artificial reef Water safety tickets/certificates to be used by Scouts/cadets/life saving/
Support	looks like a good combination	not really	wheel chair access
Support	I feel thsi way because we have to move forward with this ASAP. The town needs a jetty and opposing this concept design would only cause further long delays	No answer	No answer
Support	I would like to see an artist's impression of the jetty in its entirety. Otherwise I like what I see, especially the diving platform. The kids will love that. I hope the fishing platform is big enough for the visitors during the school holidays. We used to have fights over the 75m mark.	I used to dive off the old jetty (James Street) when I was a kid. I caught my first fish off the new jetty (tanker) when I ws 8 or 9. I held the bamboo rod for dad while he rolled a cigarette. I caught 3 fish whilst he rolled one cig. The shed was there then (1945/46)	The odd seat for sitting for elderly walkers. No skateboards. Lighting for night time fishing. Cleaning table.
Support	Would prefer it to be longer and if money becomes available in the future maybe lengthen it and possibly have an underwater viewing area. But we need a jetty built now. Like the design as it is.	No, the draft concept is very good	No answer
Support	I feel it is a great model for the replacement of the old jetty	No	Taking into account that it needs to be family and tourist friendly
Support	I like the idea of the new jetty and keeping the historic value in the sections. Great for fishing, walking and promote tourism	No answer	Hopefully there will be cameras installed

Support	It appears to be a reasonable compromise between the preferred option of an all timber jetty and an ultra slick kitchy design which was first mooted	No answer	More timber decking and less concrete. Consider maintenance and upkeep of the structure, ongoing costs, and make provision for this from the time it is completd
Support	I support the concept but would like more of the original strucutre and for there to be a swimming platform closer to shore for kids	community, families and history. Three tings i feel our shire have forgotten about and disregarded with this whole process.	It should also include a swimming area closer to shore for families to enjoy. You have done such a great job with the headland to accomodate failmies i really think a swimming pontoon attached to the jetty closer to shore would be used a lot. It would be even better if it could be enclosed (to keeps sharks and nasties) like the jetty at streaky bay in S.A.
Support	I think it is a great balance of history and new.	I know my kids will say watching the fisherman clean their fish and give the scraps to Mr Seal.	I would have liked to see a lower deck for fishing. If there was one thing I didn't like was the smell and sight of old fish bait and the stains of squid ink when walking on the jetty.
Support	Looks pretty good...could see room for improvements but that may not be within budget		I think more shared and varied licences for food vans in the area will inject more life into the space. The shire restrictions on food vans are ludicrous
Support	I like the modern vibe. It's all inclusive. I like the one we had but were not going to have one the same so let's just get on with the job and get it built.	I liked the length. I think having the cruise ships being able to disembark on the jetty would be a good thing. People won't use tenders therefore it's a missed economical factor for our region.	Obviously fishing. Also the disembarking of the ships.
Support	It would be great to see it longer, but I understand finances restrict this.		
Support	Looks like it has addressed the needs of the majority of the community ie divers, fishers, historic interest etc	Not quite the jetty itself, but Berryls Eats was a big part of my youth and night jetty walks! Fond memories! And of course Sammy the Seal!	Ease of access for people in wheelchairs. It is possible to include any of the old timbers? Access for fishing and diving. Facilities to clean fish. Swiming platforms, similar to Busselton jetty.
Support	I think it's achieving a result, maybe not the ideal design but it has length and incorporating some aspects of the original design.	Fishing and playing on the jetty as a child 35-45 years ago.	Incorporating more of the old design and actual timber across a longer length of the jetty.
Support	I want that something happens! It is a disgrace to look at the old lady (jetty)	No answer	Use as much as possible from the old jetty, even if they are only features. Let local artists do something that's worthy for the history of the jetty, with the old timbers
Support	Just want have a jetty again!	Always remember fishing off the old jetty and seeing it packed with tourists	
Support			
Support	We need a jetty now build it as soon as possible		
Support	Blend of old and new - sensible design	No answer	No answer
Support	A disgrace that the jetty problem hs gone on for such a long time.	No answer	The rail inlays are unnecessary and could prove to be a safety factor. Seating that is fixed should be installed so elderly people can use the jetty and be comfortable
Support	Better than the one we have	Just good memories	Small train for summer time. Solar lights

Support			Seating For the Elderly a Water Fountain May be or allow a Coffee Take Away Van to sell Coffee and Burgers at the End Of the Jetty
Support	because i think that the shire should keep some of the old jetty	fishing at night	i think that u should take the concrete out of the path connecting the jetty and put the old wood there
Support	Its a nice way to mix the old with the new. Although I'm a bit concerned about the structure for the original part the jetty as of the condition of is degrading		
Support	there are some feature that people and I would like to see and would be able to do fishing and other activities that other people can do	no, i do not have any special memories.	there could be a diving platform for if people would like to dive of the jetty and if there are spots for people where if your fishing and you can put your items there and wouldn't be affected by the weather conditions.
Support	Designs are good but from an engineering side however i want to see more in depth thought into the materials used for the construction of the bridge. Also id look into how easily parts or sections can be replaced if damaged and durability of each material.		The only thing i can see that id question is the materials used as well as footings. If this jetty is going to be long term council should look into more details
Support	It appears to fulfill the parameters given and the needs of the community	No answer	No answer
Support	A jetty is norti for fishing and catching blue crabs.	Eating Berrels and catching a swimmer crab with scazzy boy.	Have some food vans and don't tax them shit loads for being there you fools.
Support			
Support	Much better design than first offering. Design is more sympathetic to original design, dive platform is a good idea. Only complaint is that it is much shorter than current jetty.	Fishing, Sammy to Seal	Incorporate a range of textures, so not just long stretches of concrete- use some timber features or save some of the original timbers of the old jetty and preserve these by encasing within a clear liquid resin that sets hard, or within a heavy duty acrylic case, to prevent further deterioration and then inlay these panels randomly amongst the concrete surface.
Support	The designs are fine. I just think we could do something better than a jetty to bring in tourists.	It was pretty to look at and photograph, and was nice to have Sammy the Seal hanging out with people on the foreshore.	I think Council need have considered everything. Now just take a leadership role and deliver it without overconsulting the community.
Support	The old jetty as beautiful as it was has reached its use by date. It needs to be replaced - history. Something will be better than the alternative - nothing. Build it and they will come - don't and the locals will condemn council. The replacement jetty must be in its current location	Plenty - none the shire would consider important	Materials of construction need careful consideration. By appropriately qualified people. Aesthetics vs durability - timber handrails? Inlaid steel rail simulation - good concept - see first point. Steal balustrade - strainless.
Support			
Support			pontoon

Support	Because it meets both the needs of the people who want to tare down the jetty and those who wish to preserve the jetty in its original state	None that i have, I have only been resident in Esperance for 4 years.	Perhaps there should be a platform for small water born vessels like dinghy or rowboats to moor up to to enable a wider variety of use of the new Jetty design. This would enable a better use of squid fishing and perhaps tours can commence from the tanker jetty in the future, enabling shops to open on the waterfront.
Support	It has a modern design and different sections		
Support	because your actually doing something about it...?	the seals that would come when fishing	add a place to dive of the end
Support	I want a jetty	nah	I dunno
Support			
Support	because we need a new jetty that will suit our town	Seeing sammy the seal and relaxing on the jetty while my brother was catching squid	Make sure there are stations to clean the jetty in case there are any incidents and having easy access to the water
Support	The reason I feel this way is because I grew up with the tanker jetty and have many memories there. I want the new jetty as historical as possible but I also want it to be a place loved by the community in the future	Maybe that families would walk over it at night time	The council needs to consider the old and young
Support	looks cool	sammy seal memorial	lots of safety stuff eg rails seats etc
Support	because your fuckin idiots for letting it deteriorate in the first place fix your mistake bitch	dumping my mothers ashes over the side	
Support	I like the new design, however, it needs to be longer...		Need rubbish and recycling bins along the jetty for people who get food and then walk along
Support			
Support	It's dope	Fishing	Tourism is a big factor, help bring that factor back
Support		fishing down the end	using the old original jetty as the start making it an icon for people to walk down
Support	Looks pretty sick, hope it has lots of seats	Do activities for young adults on the jetty	Some food stalls because it would be a trek to walk all the way back when you forget your sauce
Support	looks good	sunset fish and chips. sunset fishing.	make it pretty please.
Support	It includes aspects to suit what most people wanted in the jetty.	Sammy the seal, the jetty's birthday from around 13 years ago	Easier access to lower levels of the jetty for people with impaired mobility.
Support	Simple, effective to needs of community. Recognizes history. Need to make sure the upkeep will last as long as possible with cost effective maintenance solutions.	Walking along jetty while waiting for dinner from Beryls.	Plenty of room for multiple people at fish cleaning stations. Safety ropes, lights, bouys etc. all along the length.
Support			
Support			
Support			
Support	Just glad to see a new jetty being built (have been frustrated at community groups delaying it with protests towards the shire) and the proposed design looks good to me. Mainly I just want a jetty to walk along and fish off and will be good for tourists. I don't have any attachment to the historic jetty.	No. Only been in town about five years although I like the proposed information about the historic jetty to be included on the new one.	Simple things like lots of bins, seats out of the way of where people will fish, wider head to facilitate fishing and photos, rails not too high to prohibit kids to fish over.
Support	I like the design. On one condition, at least salvage 35-50% at best of the original jetty.		
Support	Because it gives the people a wider variety of uses.	Kids fishing with their mates on the weekend. That was our childhood and sill the best part about going to the smaller jetties here.	Consider how far away the diving platform and the fishing area are from each other. Looks great

Support	it looks great and I'm all for getting a jetty again!	I really want to see as much of the old timber used as possible. Perhaps have local artists create some pieces to be displayed?	
Support	A few slight changes could make it better	No	Make sure there is plenty of lighting on both sides of the jetty, shelter from rain or wind would be nice and toilet at the end
Support	The design is good and i like all the input into it to be a useful recreational jetty		Some stool for the fisherman to sat on which could looks like a mushroom anchor. Maybe some long view or binnacle to look for whales during the migration season. Benches to sat on.
Support	Looks like everyone has listened, incorporated something for everyone, I especially like the idea of the board walk being made out of the old Jetty		
Support	Needs to be longer for 5	No answer	Needs yellow light not bright white. Longer
Support	I like the looks but think it would be beneficial for the town if the jetty was made longer so the cruise ships could dock onto it	No	Use wood to frame the top so it looks more natural than with steel only. Build ladders in intervals to make it safe (just in case somebody falls into the water) and give kayaks the chance to enter the jetty from the water
Support	Longer would be better		Fish cleaning station Seating along the length of jetty Rubbish bins on jetty
Support			
Support	ESC won't fix the present jetty so the concept is next best option.		
Support	I feel the concept design ticks all the boxes, it caters for a wide range of uses while giving a view of the historical value of the original jetty.	My only memories of the jetty are much the same as everyone else's , I have wonderful memories of fishing there and walking with family along the jetty	Safety should be the number one consideration, ladders and life rings
Support	i support the concept but using as much of the existing jetty that can be salvaged		The design should be done in such a way that we can add onto it in the future if possible. Add length, structures etc. The design should incorporate as much of the old jetty as possible.
Support	The plans look great but there could be more of the first original part? Otherwise I'm completely happy to just get a new jetty that is more like the original. Better than the first proposed plan 🖐		Maybe a cube safe area for if leaving personal items while swimming at the end of the diving area
Support			
Support	Neither feel strongly for or against, simply want a useable jetty that supports local and tourist needs.	Sammy the seal	Sloping deck to start of jetty should be inclusive of all - prams, wheelchairs, reduced mobility.
Support	Seems a sensible balance of replacing the old with something with the potential to last longer. There are projects I might prefer to see funded--such as a walk like the Bibbulmun track, between Hopetoun and Munglinup-ish. However, I understand the jetty has been significant in the life of local people.		
Support	The only thing would be good to have cruise ship being able to dock at the jetty	No have not been on the jetty for over 30 years	Cruise ship docking
Support			
Support	I feel the new concept jetty design is great and covers all aspects for the use of the jetty from the history through to fishing,diving and just a good old stroll.	Beryls, Sammy were good memories	Design already covers everything

Support	Because so much money and time has already been wasted and now the old jetty is falling apart.	So many memories of running ,walking ,fishing, jumping in at the end climbing back up underneath, days spent there on holidays when we came to Esperance as children. Then moving to Esperance and watching my children doing all the same things. So so many. 😊😊😊	Just add a bit more length.
Support	Because it looks wonderful and caters for everyone	Not really	Whatever you think, as you are better qualified than I am
Support			
Support	Grew up here, want a jetty	Love for fishing	No answer
Support	Stable, modern but hint of old design		
Support			
Support	because its good		
Support	because		
Support			
Support		Sammy the seal	accommodate activities like fishing and diving marine tours
Support			
Support	it looks good and would be as good as a replacement as we will ever get.		i think the council should give some of the good wood still left of the old jetty and give it to some local sculptists/artists and have them create new sculptures to place on the new jetty.
Support			
Support	I would like to think the jetty could/should be the same length as the original following the exact foot print that the jetty stands now		Try to incorporate as much history and incorporate as much of the old jetty as possible
Support	Supporting the design so something gets built	No	Knock the old jetty down and leave it on the sea floor so there is good structure for fish life
Support	looks to cover a range of purposes , traditional design for the modern age	no	underwater lighting for night dives
Support	Not worried	N/A	Longevity
Support	Like the design but would just like it to be longer	Family fishing and jetty jumping	Wash down area for fish, lighting, wheelchair, bike and pram friendly.
Support	Looks good, has good functionality aspects-walking,fishing,diving etc) could be longer still!	Spent many a day/night walking up the jetty with an ice cream or fish and chips. Checking for Sammy along the way	Looks good as is, if adhered too
Support	Something needs to be done ASAP but disappointed it couldn't be the same length as the old one.		
Support	Like it but would be nice to see it be the original length not a shorter version and may allow a cafe or something cafeteria like built at the entrance	Sammy	Make sure its wide enough and good seating for young children and the elderly
Support			
Support	Miss having our jetty and like it back asap	Fishing, a good cleaning bay out on water	
Support			
Support		Functional - spending time there as a family	
Support	It seems to be functional and what the people asked for originally. Sadly not to length but happy it is not just a token jetty	No	Concept seems sound

Support	It has features that nod towards the very original (diving platform). Need to move forward and get something	The diving platform	Reusing jetty timbers for bench seats/furniture. Would like to see a section of the original jetty erected at the entry of the jetty for people to walk under and has all the history on the pylons for people to read
Support	Any jetty is better than no jetty		
Support	I like the design but not what it is made of. Concrete & Wood will only last around 30 years, and will need hundreds of thousands of dollars in up keep during that period. If it was made of recycled plastic or a comepset material, the jetty would need minimal maintenance, but still keeping the look that everyone is happy with, and re-using plastic that would otherwise potentially end up in landfill.	In the nearly 20 years that I have lived here, I have only been on the jetty a few times. I nearly made it to the fish cleaning tables as I felt unsafe on the jetty and could even feel it moving back then. As a disabled person. I hope to take my gofer on the new jetty all the way to the end.	There should be a separate deck for kids to swim off of closer to the beach, but away from anyone fishing. Seating for those that want or need to sit.
Support	I'm over waiting, waiting, wsiting for something to be done. A decision made by a past Shire has helped destroy our Jetty. Although I love the old girl and all the memories. It's time to do something.	Not really but the Jetty was one of the first things I saw on my arrival here many years ago and the first thing I visited. I'm sure it must be the same for many.	Make sure there is access for all to the jetty. Make sure that there is enough space for all abilities, ages and special needs to fish. Make sure that the sea dragons that have returned to the jetty are disturbed as little as possible. Let people know that they are there.
Support	I like the 3 different sections for the jetty. I think it addresses the different uses by the community. I like the interpretive nodes and I also like the idea of a dive platform which is something we didn't have before	Walks with my children and family. Fishing on the jetty with my family. Eating fish and chips on the jetty or something from Beryl's eats. I love the aspect of being on the water.	It is only one little thing I would like to change and that is I would prefer having timber balustrades on both sides. The steel is not historic, it was just put there to replace the timber that has broken down
Support			
Support	Better than having no jetty at all	Train track down the middle from when they used to offload goods from ships. Fishing with friends and family - especially family from interstate and overseas	Miniature train to take passengers out along the jetty and some shops where you can buy drinks and icecreams as well as supply diving/fishing gear
Support	We need jetty. It looks very nice and practical. I don't see 80 year old wood as anything but old wood that has rotted. Time to replace it.	No . I just miss being able to walk or fish there on a nice summer night.	Not qualified to make any suggestions. Maybe some bench seating
Support	It seems to be a functional design, with the community able to use it much like the previous structure	No answer	No answer
Support	GREAT CONCEPT LETS GET ON WITH IT.		JUST BUILD A JETTY.
Support			I don't fish but the jetty must meet the demands of families who fish I just take grandkids for walks on the jetty
Support	Just go for it. In my opinion do the whole lot as the fishing section (all concrete)	No answer	No answer
Support	Looks like somethng that withstand the time in future and cater for all community and tourists.	No	No comment
Support	It's just that not having a jetty is costing local businesses money	Does not worry me - we just need a jetty	Diving, fishing, walking (exercising) in general
Support	I am saddened that the shire has let the jetty fall into such disrepair over the years and now it is forced to replace it. So much money wasted	Walking on the jetty, riding bikes out there	It would be wonderful to have a berth for cruise ships. And more cafes etc.
Support	No answer	No answer	I think it would be better if it was longer to accommodate cruise ships
Support	I feel this way because of my age, because my dad brought me to Esperance 72 years ago and it was the first time I had seen the sea and we camped near the sandhill with the local aboriginal people	As above and when we came down each Christmas holidays we caught fish to eat off it	I like the design as it is outlined
No opinion	think we should leave the jetty how it is	no	dont touch it

No opinion			
No opinion			
No opinion	just want a jetty	sammy the seal	hoses and fish cleaning gear
No opinion	I feel like there should be more community local art, I like how they are keeping the history, but the local art would be a big boost	No, I am new to Esperance, but I've been here for 2 years, and the town evolves around the old jetty, I think they should involve more parts and artifacts from the old jetty into the new one.	Maybe locate the fishing more at the end, I'm sure people don't want to walk past the smell of fish halfway through the walk.
No opinion			
No opinion			
No opinion		-fishing -long walks	
No opinion	Concept in general is good although more original don't tinker needs to be utilised	No answer	Staggered handrail (as per detail of fishing end) needs to be both sides. Access to timber to use for making garden art or furniture.
No opinion	The designs are fine I guess but I am over this issue because of how long this has been dragging on and have basically lost interest in the replacement (or non-replacement) of the jetty.		
No opinion	I feel there is to much metal and concrete, not enough wood to be in line with the old jetty.	Not being a big water person, I loved to walk out a long way as a youngster to enjoy the outlook of the water and to chat with people fishing. That's why it is important to have a decent length to the jetty as the original	I am not interested in either diving or fishing. But it's a great walk out.
No opinion		Like everyone else we used to go for walks and fishing of the jetty, so the sooner its rebuilt the better for everyone and the community with tourists visiting the town.	Have pontoons connected with easy access for divers and similar for fishing.
No opinion	I believe the length should match the original design	The jetty was built to provide Esperance a commercial gateway to the state and world, this jetty should reflect this in some way	Install landings long the route for swimming and fishing, similar to what was on the original James Street jetty which provided a hub for children at the time
No opinion	Dont particularly want the jetty to be there. Bring it closer towards Andrew St. Extend the jetty off the the helicopter pad. Incorporate in the design a floating jetty underneath to dissipate the waves or fetch created by winds from the East.	No	Unsure
No opinion	I'm worried about any timber use because it is expensive to replace and it's not durable	I was at the ceremony of driving in the first pile, for those days it was an important event.	I think a toilet out at the end is important. Water for drinking and fish cleaning
No opinion	I like all the designs. But it'd be nice to have the wood decking with the 250metre length but still have the lower platform	Fishing. Talking to the old fellas while they fish	Disembarking for the cruise ships
No opinion			
No opinion			
No opinion	havent seen the look of it	went fishing	easy access
No opinion	i havent seen them		
No opinion	I do not care what happens to the jetty.	no	ladders, railing and fishing spots
No opinion			
No opinion		jumping off the end	
No opinion		Jumping off and fishing	At the end of the jetty they should put an underwater area so you can walk under
No opinion		The trash politics of the local shire.	offer a \$50 incentive, always works.
No opinion		i once sprayed the seal with the fish spray water guns	consider all ages

No opinion	I like the overall idea of the jetty although to add I think the installation of power outlets would come in handy to charge devices while fishing	A dedication to all the locked does from the uneven timber.	To say this nicely, people are ignorant. Any design proposal needs to be spelt out VERY clearly and have no way of being misinterpreted. Also, it may be a good idea to highlight the ideas that have been used that have come directly from public influence and not the shires initial decision.
No opinion	I think would the curve be going to the left instead of right be better	No answer	More lighting and seating and dredging at end
No opinion	I'm too old to even consider a concept design for the jetty. It just goes in one ear and out the other	No, I just don't want to be bothered	No answer
No opinion			
No opinion			
No opinion	i think that if they rebuild the jetty it is going to cost a lot of money and it will effect the town in many ways but i do agree with it as well as it it a great idea and the tanker jetty is esperances star attraction to tourists and now that its fading esperance is losing money because we aren't bringing in that many tourists any more. so i don't know if i'm for or against it to be honest.	no	i think they should make a jetty like the Busselton jetty so make a bus tour so tourists don't have to walk all the way up to the end and back. they should definitely make it more attractive. maybe get people to do nice big morals on it and put lights underneath the jetty for night time.
No opinion	i hope the jetty burns in water. makes sense doesn't it?	NOPE	Free WIFI!!!!!!!!!!!!!!!
No opinion	Don't care too much what it looks like, just get the thing built!	Not really, just a functional jetty and that was a great asset to the town	Time scale
No opinion			
No opinion			
No opinion	It needs to happen but I think the concrete on steel section is too much like a car park. It will be there for a long time and it's worth making sure it's something we can love. Restore one or two bays to keep as part of the final jetty as a true link to the past	Walks with the kids. Fishing for herring as a kid. Fish and chips at sunset. The cold sea breeze	It needs a better tie in to the historical jetty. Keep more of the unrestored timbers etc in the jetty itself, not just as a token like chairs or nodes. Don't worry about the fishing, the whole point of fishing off a jetty is that you just find a spot and fish, we don't need a special fishing section
No opinion	I would like a jetty with a choice of options for use during different wind directions.	Sitting on jetty with legs over edge enjoying sun, fish and a good laugh with my children, grandmother and friends. Visitors ALWAYS wanted to go to jetty for a walk and enjoy the vista.	As long as there are options for wind direction, places to sit and contemplate life, suitable for wheels on prams and gophers.
Oppose	Because I think that we should keep the old Jetty but fence it off to the public, so it is not a hazard but it can stay there, because it's one of the oldest and most famous landmarks that Esperance has.		
Oppose		fishing	to protect marine life
Oppose	Because it should stay as it is, it's about history and the local history for 80 years	Yeah, fishing and playing with family	I can't go ahead
Oppose	no historic section. There is already enough of this on the foreshore		Make a shark net going off it so people can dive/swim in safety
Oppose		Sammy the seal when you could spray him with the hose.	i feel like they should have a part for fishing diving/snorkling and jetty jumping.

Oppose	Feel the design itself is good but needs to be longer and more spots for fishing	Just taking the kids fishing as it was something simple for them even when you just through the fish back the excitement of always catching something there. Also just nice leisurely walks enjoying the view	More fishing spots, longer in length or option to extend later on
Oppose	It's a great multi purpose jetty for divers, fishers and anyone who wants to go for a walk it'll be a great spot for everyone.		
Oppose	While I do like the appearance of the concept design I would prefer to retain a timber jetty structure in keeping with the heritage value and significance of our current jetty	Rather than interpretation nodes, I'd like to see a reconstructed timber jetty as to the original 1934 structure with changes in overall build as it is no longer required to carry a train or dock a ship	Please consider the original plans. This current jetty has been a major and iconic attraction in our beautiful Esperance seascape for many years and is much loved both within our local community and also our surrounding communities and tourist traffic
Oppose	Even though the concept drawings aren't bad I feel that a the initial part of timber structure would be great to have the whole way along. It embraces the "old jetty" well.	Fishing as a kid along the timber jetty sections of the jetty remains my biggest and favourite memory.	I think the timber deck it quite important. What is a jetty without timber? I think that it misses the mark. The concept is close to my personal approval.
Oppose	Length and there's no sustaining a viable business to help fund future up keep of the future jetty not proposed		businesses to promote tourism
Oppose	Make it the original length!!! More covered areas. Covered area for parking. Small tourist train would be a fantastic addition or at least some form of transport to assist mobility impaired individuals and/or young children to get to the end of the jetty. Use of rust proof materials to ensure longevity of use and reduce long term costs to shire		
Oppose	I believe you are not looking at the bigger picture.A new jetty predominantly made of steel ,to me,is not sustainable.We will be looking at this same problem in not so many years to come. More timber,similar to the original design would be preferable. Why would you inlay railway tracks which would not be used and ,in time,rust?	Diving and fishing for a good many years of my childhood,	Use of lower landings to either side of the jetty for swimming etc. Tie ups for boat access.ie on lower landings..
Oppose	I feel that the whole structure needs to remain tradition plus the longevity of modern materials is questionable	Sammy the seal and railway	No answer
Oppose	Want it repaired		
Oppose			
Oppose	Restore, renew, reinvigorate our heritage, our original unique jetty	New year sunrise at the very end with a group of friends	Integrate old betty with fabulous new foreshore
Oppose	Concrete simply ugly. Too much over land not sea.		Don't try to make it modern. Much of the charm of the Jetty is it's sense of time & place ie history
Oppose	I have always wanted restoration not replacement.		
Oppose	I dont believe that the full restoration of the jetty has been sincerely considered by council.	No . Are you already going to concept design?	
Oppose	It's boring, nothing uniquely Esperance about it. Not much artistic merit	No	Make it look different from every other jetty in the world
Oppose	I would like to see the jetty restored		
Oppose	It's unbelievably bland. No artistic merit whatsoever.	No	Once in a lifetime opportunity to produce an iconic work of art is being squandered.
Oppose	My children and myself grew up with this jetty .I want my grandchildren To be able to build memories on it too	Just the entire jetty	The original design

Oppose	Because it is not a design for a full length jetty. I like the design in general but think that the full length should be designed and then done in sections, the first being to the value of \$6million. This would allow eventual diving to the artificial reef .	No- I think consulting some that built it and worked on it would bring some wonderful ideas.	I think there should be some kind of building that can be used as a small shop that could sell memorabilia and some drinks/food.I think we should be looking at how the Jetty can add to tourism and bring back some return. I would like to see the tracks put in be functional 9as they are in Busstleton. I'm sure a group like Lions or Rotary would run a motorised small train out which would be terrific for the elderly/disabled who may not be able to walk to the end.
Oppose	I don't feel there is enough wood in the design	Its BIG presence on the foreshore,	Seating along the jetty and fish cleaning facilities.
Oppose	It is not long enough to do the job	Yes, lad loading of wheat in bags onto the boats	Lot more wood in it, concrete no good
Oppose	Historical significance	Repair existing jetty	Repair existing jetty
Oppose	Reconstruction of the existing structure is not only feasible and practical, it is also more cost effective and it retains (without apology) the legacies of the original jetty which is so loved and respected by the community and its forebears.	There are many memories and recollections that a person with seventy odd years of contact with the jetty can have. While the "nodes" concept will stimulate recollection, it will not and cannot convey the overall aura of the old tanker jetty with any degree of efficiency. If I was to attempt to list my own memories of special interest here, they would take up at least a page of closed type and even then it would not effectively serve the purpose.	If one sees the original design as being worthy of reconstruction then it should only provide the same facilities for people using it in the future as have been available in the past. These have served the community well and while the addition of more modern "facilities" would doubtless make its usage more convenient for the modern user, they would impact upon the necessity to retain the heritage fabric.
Oppose	I believe the proposed replacement jetty will be too short. I can remember when the old jetty was packed with people. It does not allow for future growth of teh town, short sighted thinking!	Not really but the jetty always had a special place in the hearts of the people of Esperance. It was an integral part of use and is sorely missed.	No answer
Oppose	I oppose the concept design, not for the actual design, but I strongly support the restoration of the original jetty, utilising salvagable timber,and replacing the deteriorated pylons and decking with new timber from the south-west. Esperance has lost a lot of historical buildings in the past, which should have been saved. So I say no to a replacement jetty. It's the same as the ugly modernistic post office building, built to replace the superb old stone telegraph station. What a loss that was.	None that the shire would consider, but the tanker jetty holds many memories for me and my family. We travelled down from Coolgardie, staying in the caravan parks, and spending heaps of time on the Esp. foreshore. The jetty was great to fish, catch squid, meet other people and admire Esperance from out on the water.This was in the '80s. We moved here in the early '90s and used the jetty for recreational purposes, until it was closed of to the public.	The design of the replacement is fine. I would prefer it to be restored using timber though.

Oppose	Because I still believe in restoring the jetty to its original condition is the best and preferred option, both in building materials, historical importance and longevity. Busselton has successfully accomplished this. Nowhere in the world do you see jetty's of this length or build. The boardwalk in Whitby, perhaps. I have contributed money to the ongoing restoration of this jetty, it is still galling and appalling to see that the jetty has been allowed to get in this state. What do you not understand we do not want to see another ugly concrete and steel monstrosity. Look at the building a new wooden civic building, at a comparable or better cost. It can be done. Modern steel and concrete is not going to stand the test of time either. I'm tired of you not listening to people, to the majority who wish to maintain this Beautiful architecture not found anywhere else	This is a crock of bullshit to place a plaque or viewing picture of what was, keep it restore it and it lives and breathes as a living historic reminder. Once it's gone it's gone, no memory node will replace the history. The submarines, the fuel ships, the trains, the characters who fished. Look to Busselton, their successes.	To retain preserve and keep the jetty in its whole original form and structure as others have indicated through independent reports. Listen to the specialists and not trumped up government reports, which do not have specialists contributing to this. The council needs to reconsider the uniqueness of what we have and rebuild reclaim and preserve the function, length and integrity of the existing structure rather than wasting more and more of our money on feeding architects conjuring up a second rate monstrosity which is not proven to be effective nor withstand the elements.
Oppose	The concept does not look at refurbishment of old jetty. There is no care for the marine life especially the leafy sea dragon if demolition was to go ahead. I think the shire has dismissed the alternative report which was presented to refurbish existing jetty without proper consideration.		The jetty needs to be longer, the concept should have provisions for extension at a later date.
Oppose	Where are the facilities to enable the cruise boats to connect to the jetty either through direct disembarking or landing of the ferry boats? We are missing a significant tourist potential by ignoring these facilities.	No	What about the longer term future of Esperance by connecting this facility to cruise boats creating a great first impression for visitors, this should include the ability to use a golf cart or light tram style vehicle to bring them closer to town. This is a big opportunity to set up facilities that will ensure Esperance has a long-term future that will support farmers and locals when times are tough.
Oppose	While this design is a little better than previous concept i think it needs more timber to be a true nod to the history of the tanker jetty. I dont like the concrete deck, it is hot and reflective and not a good environmentally friendly material. It is not long enough to cover the light sensitive marine environment that is alive under the existing jetty. To say that it can be extended with further funding is unrealistic. Once this is up that will be it, more funding would be highly unlikely. I would not support the lifting of the heritage order that is currently in place for this design		Full timber deck Longer
Oppose	Destroy the sea life already established on the jetty	Yes always fished of the Tanker jetty when came here on Holidays (except when the fuel boat was in), then when moved to Esperance it was only place to catch fish, My father (deceased) and his BIL along with other family members used the jetty. Father wanted his ashes to be scattered from the jetty and would be disappointed at seeing the condition it is in now.	The sea life under the jetty now, the heritage/history of the jetty.
Oppose			
Oppose	coz its gonna be short	dragging a lure through the side of my little brothers head	ladders so i can jump off it
Oppose	I support the use of modern materials however I think the deck in its entirety should be of timber construction		
Oppose	Make it all out of the prefab concrete so it is cheaper or can be made longer for the same price	No	All looks good

Oppose			
Oppose	Its not long enough - jetty must be replaced AT LEAST to it's former recent length - preferably to it's original length. The length of the jetty is one of the most important historical values of the structure and should not be a negotiable factor.	Too many to list and I don't like the idea of the "key interpretation nodes". The jetty is not a work of art or a cultural trail. It is a key piece of historical infrastructure whose use was valid and varied until the day the council shut it down. Key interpretation nodes, in my view trivialise the values and memories of people who used the old structure, and will interfere with the creation of new memories with a replacement structure as they invalidate and undervalue the contemporary users.	LENGTH !!!! Weather protection shelters on the jetty head, and half way along the deck.
Oppose	I don't think all the costings going forward have been accurately assessed	Just of many people catching herring and squid	I think the concept design has enough provisions . A refurbished jetty could have the same
Strongly oppose	want it done	yes i went fishing there for 2 mouths straight on holidays i caught many herring	will it break/ collapse will there be much space
Strongly oppose	needs a good indoor chillout spot near end	Jumping off with all the bois, so in saying that their needs to be a diving platform	dive trail under jetty and shark saftey
Strongly oppose	Don't want a replacement jetty. Redo the old tanker jetty . The old tanker is home to a rare seahorse. A shortened new jetty will impact on a decrease of the variety of fish available to the public.	I have lots of memories about the tanker jetty. Some private and fantastic family social occasions.	
Strongly oppose	I love the old wooden jetty. If it can be fixed it should be fixed. Don't like the new one.		
Strongly oppose	i like the wooden jetty	i used to walk on the jetty all the time with my mum and see sammy the seal.	
Strongly oppose			
Strongly oppose	i liked to see sammy the seal at the jetty, i like the wooden jetty	sammy the seal	the jetty is good for old people as they can drive their scooters on it.
Strongly oppose	Its awful. Bits and pieces of nothing.	I love the jetty and have many memories, and I don't think it will b e demolished.	The tanker jetty is beautiful as it is, unique.
Strongly oppose	i like the way they are keeping old parts of the jetty like the diving platforms	fishing sammy the seal	gazebos with chairs
Strongly oppose	I want to fish off the wooden historical Tanker Jetty	Yes, how the ESC saved the Tanker Jetty	By fixing the Esperance Tanker Jetty instead of letting it fall in the water
Strongly oppose	Keep the old jetty	Walking the length and fishing and swimming	None keep the old jetty
Strongly oppose	I want the original jetty repaired	Lots of family memories	None keep the old jetty and fix it
Strongly oppose	We want the Tanker Jetty saved, don't want a concrete one	I want to have many more memories with my family fishing off the original Tanker Jetty	Save the Tanker Jetty
Strongly oppose	Yes I do because I want to spend time with my family on the historical Esperance Tanker Jetty	Just fix the historical Tanker Jetty for the people	Nothing would make it more attractive than our beautiful iconic Tanker Jetty
Strongly oppose	Because my family want to fish and walk on the original Esperance Tanker Jetty	Yes I have special memories as a kid fishing off the original Tanker Jetty with my family	No
Strongly oppose	The tanker jetty can be fixed	Lots, but I don't think they will be needed.	I don't think it will be approved so this is not relevant
Strongly oppose		Spending many nights fishing off the jetty	Restore the yetty back to its original design
Strongly oppose	Reconstruction of original is paramount	Fishing	None keep original
Strongly oppose	Because building a jetty is a waste of money.. use the money for a new sports stadium	Nope.	Knock it down and build a pub with a nice beer garden. This town is in serious need of one
Strongly oppose			

Strongly oppose	The heritage aspect does not feel honored.	I don't understand what the nodes are meant to be.	The length, shape and construction should protect the current sea life that has formed on the Tanker Jetty.
Strongly oppose	not long enough, not the same as the old jetty.		it should be made longer and more like the old jetty
Strongly oppose	Over 8000 people signed a petition calling for restoration. The shire hasn't listened.	I don't believe the community wants interpretation - spend the money on refurbishing the jetty instead.	Listen to the community please. They want exactly what is there fixed.
Strongly oppose	Because our Tanker Jetty is a beautiful Jetty with much history and not ugly as some Councillors would have us believe.	How about 8000 people signed a petition to try and save our Esperance Tanker Jetty from being treated in the most unjust and neglected way.	Council needs to consider how much the Esperance Tanker Jetty means to the people who have elected them.
Strongly oppose	I think if you are unable to afford maintenance on an existing one that is supposed to be heritage protected, why build another one. Especially when tourist boats can not dock on it and it provides no financial return.	Yes, fishing with my friends kids and parents. Swimming and diving along the length of the jetty. Great times at the base of the jetty. A lot of great memories that are currently being denied by the neglect of the current state of the jetty.	Having a sink to scale and clean fish, and life bouys available. Ladders that can provide access along the length and a pontoon or lower deck at the end.
Strongly oppose	The plan tries to use some of the form and features of the current jetty but, in doing so, feels like a pastiche that is both soulless and boringly functional. It reminds me of sitting in a fake Irish Pub in that it is working really hard to try to make you feel like you are experiencing the real thing when you actually know you are drinking beer brewed in Australia whilst surrounded by miscellaneous tat supposed to make you feel Irish. My thought is why replace the jetty with this when you could repair (and enjoy) the real thing?	"Key interpretation nodes". I am pretty sure this isn't a thing	
Strongly oppose	Needs to be longer.		Make it longer
Strongly oppose	It's dull. The previous concept, which looked like the ribs of a whale, had some architectural merit. This has nothing. A primary schoolchild's depiction of a jetty would have more flair. I'm 100% in favour of a new jetty, never thought restoration was ever a go, but come on, guys, Esperance deserves better than this.	Not especially. But for Christ's sake, don't put a memorial to the Save the Jetty Group on the new structure. Those fecking imbeciles are the reason the town has been without a jetty for the last three years.	
Strongly oppose	It's a complete waste of money. A jetty is a temporary Structure that will need to be replaced again and again		
Strongly oppose	The original timber jetty needs to be retained. Steel and concrete looks terrible and does not support the heritage of what the jetty is		Leaving and maintaining the original timber piles and structure in its entirety
Strongly oppose	We want our jetty saved.	I don't want anything showcased by a Shire that is not interested in what the community wants	I want a timber jetty, not this stupid steel and concrete thing
Strongly oppose	The Tanker Jetty is heritage listed. Heritage must be protected, saved, not demolished. Regardless of what the shire is saying, enquiries with the national trust tell me that reconstruction is not only viable and possible, it is the most prudent and feasible way forward. Besides, this council never listens to the people they were elected to serve. You8 cannot sweep petitions and motions at electors meetings under the carpet. It's not right.	No relevant. It will be reconstructed.	The concept wont be approved.
Strongly oppose	I'm in favour of refurbishment of the old tanker jetty	Retaining every aspect of the original jetty	Re build of the original jetty

Strongly oppose	Looking into restoring and reusing as much of the Heritage list jetty should be looked into before dismissing and deconstructing and building a smaller less user friendly concrete jetty that does not retain enough historical value . The full costing of the concept draft plan has not been given out to community. There has been no mention of protection of the marine life that has been living under the jetty for 83 years in this concept. This concept restricts the community from using the jetty more freely due to the way the draft concept has appoint areas for use. Concrete is not as user friendly as wood is, concrete gets very hot in the sun and is not very friendly to people that want to sit on it to fish. When people catch squid and they squirt ink out it doesn't wash off like it would on timber jettys. Concrete has a lot shorter life, also would cost more to fix if larger section had to be lifted off to fix under the jetty.	I do not agree with this question as I do not agree with the concept design.	I do not agree with this question as I do not agree with the concept design. A lot more looking into restoring and using of the heritage listed jetty should considered.
Strongly oppose	The emphasis should be more closely aligned with restoration over replacement. I would also like to know more about the proposed length vs the original length. It is such a beautiful and unique structure. Retaining the original design is so important for the history of Esperance to truly transcend generations.	I don't understand what the interpretation nodes are. They wouldn't be necessary if the focus was on restoration over replacement.	Stay as close to the original design as possible as it has successfully served the towns residents and visitors for such a long time.
Strongly oppose	Fix the old jetty. Its better	To many memories to mention	
Strongly oppose	The heritage council does not support demolition. Why is the shire trying to demolish a rare state heritage listed structure? There has not been one attempt at proper maintenance of the structure since the shire took it over in 1990. There are over 100 timber jetties in South Australia, so they are easy to fix, so why is it not being done?	Spend the money on fixing the jetty, not on interpretation nodes that will just need maintenance.	Restore the heritage structure. Heritage Tourism is the fastest growing sector of the tourism industry. The people want it, evidenced by the petition of over 8000 people. What a shame that the shire don't consider all the people of the goldfields who love the jetty too.
Strongly oppose	Because the Esperance Tanker Jetty deserves to be saved	No nodes will ever retain the heritage of the Esperance Tanker Jetty	The only attractive thing would be to reconstruct the Esperance Tanker Jetty so we can fish and dive off it
Strongly oppose	Give us back our real jetty	Totally useless things	None. Just don't approve the design. Reconstruction of the tanker jetty is the only way to go.
Strongly oppose	Hate seeing what little history Esperance has left demolished.	I have many special memories that won't be considered by the Esperance Shire.	Cost.
Strongly oppose	We want the original jetty saved and rebuilt like they do in many other towns around the world, thanks !	We do not want just memories we want to experience walking and fishing off the Tanker Jetty again when it is saved and rebuilt, thanks!	The only attractive thing would be to save and rebuild the original Tanker Jetty, thanks!
Strongly oppose	I feel that the historic tanker jetty being the only one of its kind left should be reconstructed.	I have many from early days coming here from Boulder, but they will not be needed.	I don't think it will be approved so this is not relevant.
Strongly oppose	Restore the jetty we already have, instead of throwing something new and shiny in front of the locals to distract from the issue, bring her back to life. Its so wrong to demolish something that can be restored back to her former beauty, which has so much enriched history in our town, only to build a memorial of it in its place. Keep our heritage.	Save the Tanker Jetty.	Save the Tanker Jetty
Strongly oppose	Restore old jetty	Fishing and Late night walks	
Strongly oppose	heritage listed jetty should not be demolished all attempts should be made to restore	nights during childhood and later years fishing with family and friends	to keep as original as possible, use as much of the original jetty as they can
Strongly oppose	It replaces the old with something that should keep most parties happy.I believe that this will be the most cost effective and expedient manner in which to proceed.	More large old photos like the ones at the toilet facilities.	It should be easilu extendable for future growth.
Strongly oppose	Not in keeping with the historic importance of the existing structure.		
Strongly oppose	Original jetty needs to be re-built	The jetty need to be re-built back to original	

Strongly oppose	I'm a diver. A new jetty will destroy the brilliant growth already on the jetty pylons. A new jetty will remove the shade necessary for growth on the pylons and protection for the fish life. Check out before and after footage of the Island end of the jetty to verify my statements.	I have terrific memories of fishing off the jetty with my young daughters and their cousins. I have great memories of diving easily off the jetty before the diving platform was removed. I have great memories of the Island end attracting shoals of fish before the platform was removed. Unfortunately, not many of these memories will be replicated by your current plan and design.	From a diving perspective, you need to keep the original pylons with their original growth. From a diving perspective, you need to ensure the shade remains as is, otherwise the growth dies off quickly (check out the damage caused by the removal of the platform at the Island jetty. From a diving perspective, you need to ensure ensure the end of the jetty remains where it is so that the dive trail is easily accessible from it.
Strongly oppose	Disgraceful way to treat the historic Esperance Tanker Jetty by trying to replace it with steel and concrete!	We want the Esperance Tanker Jetty fixed, thanks!	The thing to do is throw the concept plabs away, grow commonsense and reconstruct our beautiful Tanker Jetty like they do in South Australia, historical structures all around the world need maintenance and care, the Tanker Jetty has been neglected for the past 7 years
Strongly oppose	the tanker jetty is our fathers heritage for the region..replacing the jetty is not an option.. retention of this amazing structure is of utmost importance..	the shire are totally un trust worthy.. the tanker jetty can be refurbished over many years till its at the original length and width.. the dive sites underneath are amazing.. atm there are over 40 black face shags nesting on there too...	the concept design doesn't have any heritage value.. its wrong and corrupt to remove such valued heritage.
Strongly oppose	It needs to be the same length as original jetty or what is the point. That's what made it such a hive for locals and visitors alike		
Strongly oppose	retain original jetty	fishing	none
Strongly oppose		Spent many years in my youth fishing from the jetty	
Strongly oppose	The design is too disjointed. Would love a wooden deck.	The wonderful walk to the end of the jetty passing the people fishing. Looking for seals, fish and birds. Seem to take forever and was perfect any weather, any season activity.	Seating and some sheltered niches.
Strongly oppose	I oppose replacing the existing jetty.		Fix and maintain the existing jetty.
Strongly oppose	Modern material jetties have more frequent maintenance repair/replacement than wooden structures. Wooden structure jetty is a part of our history which we need to retain history for future generations.	The full length of old jetty being filled with people fishing, no bum room between them	Stairs down into water for easier access for scuba divers
Strongly oppose	I would like to see the Jetty restored mot replaced.		
Strongly oppose	I have always wanted restoration mot replacement. Restoration has never been an option for this council.		
Strongly oppose	The concept design looks very impressive. But we have an impressive historic Tanker Jetty that is able to be refurbished. Our Shire has refused to listen to the people of Esperance on this matter. They have wasted hundreds of thousands of dollars ignoring the wishes of the people. I will not support the concept design for a replacement Jetty. If they had proceeded with the refurbishment the people of Esperance could have been using the Tanker Jetty now, instead of still debating the issue. If the Shire proceed and demolish our Tanker Jetty I will be very sad, angry and disillusioned with the process they have used to govern us.	I don't want interpretation nodes. I want the Tanker Jetty.	They need to consider rebuilding the original Tanker Jetty.
Strongly oppose			

Strongly oppose	We do not support demolition of existing jetty, We object and believe this project is underfunded, We support wood and not steel, We object to the funding costs be so Open Ended and Strongly Oppose and a concept design or project that is not detailed down to the last dollar - a figure must be nominated and stuck to. We do not have faith or confidants in The Esperance Shire Council to organise, carry out and fund properly, this project or works for the full benefits of the Esperance Community	We have a Family connection to this jetty of around 130 years since 1886 when the Dunn Family owned and operated boats such as the Narrwinni (sunk out at Lucky Bay)which use to on and off load supplies for the Esperance Community. My wife's historical family came from mining communities in and around Kalgoorlie and spent many hollidays swimming fishing and relaxing on the wonderful Esperance icon and if those old people could see the disgraceful mess it is now they would turn in their graves.	Money is the greats issue it needs to be costed out down to the last \$ and then approved by the Esperance Community. It should be like for like Wood should be utilised not Steel and parts of the original jetty should be left in situ so the historical value is there forever.
Strongly oppose	If the jetty is demolished then the endangered leafy sea dragons will be lost forever and the under water dive sight, which is one of the best jetty dives, will also be lost for many many years to come. As little as possible of the old jetty should be demolished to save these two major features of the old jetty	My grandfather came to Esperance to get a job building the jetty and now 5 generations of Andre's have fished off it. It would be sacralise to demolish any sections that doesn't need demolition.	Listen to the ratepayers! The shire is hell bent on demolition and won't look at restoration
Strongly oppose	steel is too expensive to maintain should be built of polly in this day an age like the jettys in canal blocks	no	back to the original length [total] of 750m or whatever it was including the original head
Strongly oppose	Fix old jetty	Heaps Fix old jetty	
Strongly oppose	I believe other viable options have not been investigated. An underwater viewing structure should also be incorporated	No	No answer
Strongly oppose	Reconstruction of original jetty will provide a greater tourist draw card especially if the shire council puts other tourist draw cards in to compliment original design	As the current custodial operator of the Esperance fuel infrastructure operations I believe in retaining the existing jetty as time and time again Australia's heritage assets have been neglected and we have an opportunity to facilitate the rebirth of an iconic piece of infrastructure at a lower cost compared to the end game for the proposed example submitted by the shire	None
Strongly oppose	I Don't feel the shire has looked at all options to the Reconstructionof our Heritage jetty. We have lost a lot of our Heritage over the years and have very few left in our lovely Town.my family have lived here for over 90 years.and our jetty means a lot to us with it's Heritage history and recreation it will be A very sad day if it's pulled down to locals and Tourists also the marine life who live under the jetty.	Carnt replace the memories of Grandfather & family working the boats swimming off it as a lad seeing the big ships coming in.	Just make it longer
Strongly oppose	Replacement of the jetty is very costly. The usefulness of a so called "icon" is limited to those who wish to fish, go for a stroll or dive off the structure. Tourists do not come to Esperance because there is a jetty there. In fact there are record numbers still coming despite the jetty being closed. The money would be better spent on a facility (such as was proposed by Josh Ellet some years ago) that has multiple uses - marina, fishing facility, safe swimming area for swimming lessons, perhaps a restaurant. A good example is this is Hilary's boat harbour.	I grew up in Esperance & spent a lot of time on the Jetty as a child & adult. As I have indicated, I oppose the waste of money that rebuilding represents.	Please see my answer to the first question.

Strongly oppose	Because nothing will come close as a replacement	Too many to mention	The design costs more than the Shire has already, the more everyone wants the more it will unobtainable , the state will be reluctant to give any funds considering how the Shire have treated the Tanker Jetty, after all where is the money from Sammy the Seal and where is the money that has been saved since 2011 from doing NO maintenance on the Tanker Jetty and when given funds in the past for the Tanker Jetty, it was spent elsewhere and has never been returned to Jetty reserve.
Strongly oppose	Because it is clear that the majority including ourselves wish to see the jetty rebuilt as is, wa and in particular Esperance has allowed too many structures of history to be replaced.	Our families being local for the past 70 years have so many memories and would like to see the jetty restored similar to Busselton not a new one that will have the same issues in years to come if maintained similar to the current jetty.	Council needs to listen to the community not council staff that come and go, it is clear the elected members are only going on staff and consultants recommendations not the community. Money and maintenance is not the key issue here, heritage is, as recorded on the foreshore toilets.
Strongly oppose	The jetty should never have been allowed to get to the condition it is currently in the only reason for this is the shire and it's closed door meeting in which it voted to stop all maintenance on the jetty even though this contravenes the jetty license agreement and the wishes of the community.the jetty is one of only three timber jetties left in Western Australia and a major part of Maritime history restore the jetty	Having been on several ships that berthed at the tanker jetty fishing with my kids The Esperance tanker jetty is an iconic historical structure you cannot replace that the jetty needs help not a closed minded self centred shire that doesn't care what people want	They need to consider the history the choices of the people they are supposed to be there to serve
Strongly oppose	I would like to see the facility developed to enable some commercial use. If not now at least provide for future developments. I would also like the replacement jetty to replicate the original one using upgraded materials.	No	I think it definitely needs to have some ability to generate commercial return in the future
Strongly oppose	It should be repaired as much as possible not replaced.	It should be as much timber and similar to what it is. Ie repair as much as possible.	More timber.
Strongly oppose	I want to see the jetty reconstructed where possible to meet current industry standards using the original heritage concept design and materials. I do not view the replacement concept design as acceptable.	Like thousands of friends of the Esperance jetty I have special memories which clearly accounts for why the fate of our jetty has been so passionately pursued. I grew up on the Esplanade I looked at the jetty everyday. As a child I knew the names of the people fishing on the jetty and even knew where their favourite places were to sit to throw a line. My first job when I was ten at Dixon's shop was to bag up pollard for the never ending line of customers on their way to the jetty. With one of the interpretation nodes being 'Save the Tanker Jetty Memorial' it was interesting the choice of terms used by Juile De Jong in her presentation that the impact of lobby groups caused 'division and mistrust'. The point of dissonance is to generate valuable discourse that promotes all points of view. The lobby groups should not be portrayed as incendiary because they see the situation differently from the Esperance Shire Council.	Appropriate areas in terms of the size of the low level dive platforms to accommodate diving gear. Perhaps have several low level dive platforms along the jetty rather than just one.

Strongly oppose	The jetty can be redeveloped	Old timers fishing alongside young people, tourist, melting pot of the community Jetty jumping Squid ink stains	Access for people with disabilities
Strongly oppose	I want the jetty reconstructed using the heritage timbers and built in accordance and as close as possible to the original design (mindful that industry standards have changed since then).	Ensure the lobby groups are portrayed as valuable not as causing division	Wide enough to have multiple users; senior citizens in vehicles, kids on bikes, parents with prams
Strongly oppose	Support Restoration not replacement.	Restoration wouldnt require a whole pile of interpretive nonsense.	Build to the original length for people who enjoy walking it.
Strongly oppose	Because we should not destroy history, it seems the Esperance Tanker Jetty means nothing, if everything in the world that was old got demolished there would be no historical places to visit.	My family have lived in Esperance since 1973 which equates to hundreds of special memories and recollections of our beautiful wooden Tanker Jetty ad we have always believed it would be looked after for the many generations to come, how sad that the Shire have made their decision to demolish a historical icon, how can interpretations nodes explain these, the fact is that we have a council that do not care enough to preserve this popular tourist destination for fishing, sitting and just walking along the deck with families, sharing the moment memory with other families, anyone who thinks that a steel and concrete structure is going to achieve this does not understand the significance of history.	The Council needs to realise the importance of our historical Tanker Jetty
Strongly oppose	Want the Tanker Jetty saved because my family has so many memories of fishing off it	Want the Tanker Jetty saved	
Strongly oppose	It's needs to be of heritage value, not just signs showing where the heritage was	No because the jetty should be reconstructed with the heritage value Nd then these would not be necessary	Jetty should be reconstructed with the existing features - no concept design
Strongly oppose	The most prudent and feasible way is to reconstruct the Tanker Jetty using the original 1934 design. Reconstruction is cheaper than demolition and replacement.		
Strongly oppose	Support restoration only	Yes, from early childhood and all aspects of its history	Restoration of our history. This community has lost too much of its past destroyed
Strongly oppose	The old betty is history as sad as it is, there is no way that it can be restored. You don't need a degree in marine engineering to see that the old structure is beyond repair. 87 years old, it's served it's commercial purpose. Now we need a recreational betty to enjoy.	Fishing with many generations of my family. NOW I WANT MY GRANDCHILDREN TO HAVE A SAFE RECREATIONAL JETTY THAT THEY CAN MAKE MEMORIES ON. So many if the littlies in Esperance have never been given the opportunity to go on a hefty because the members of the Jerry group are preventing us getting a new jetty.	What ever features we can afford. A simple jetty structure would be fine as long as it has the same curve as the old jetty
Strongly oppose	Section A ok,rest should be done the same reusing, recycling the old timbers . If said timbers can Be used in local housing it can be recycled on our jetty	History	
Strongly oppose	It isn't the same as the heritage jetty	Walking on the wooden timbers	Make it from wood same as the original
Strongly oppose	To preserve he historical value	childhood fishing memories for myself and my 3 children now adults with their own children.	user friendly. diving off the end

Strongly oppose	Because it doesn't conform to the heritage of the old iconic jetty. Needs to be longer. The marine life below the jetty has not been considered. The jetty should be rebuilt with the aesthetics of the exterior remaining the same but with the allowance for pedestrian use and light maintenance traffic. I believe the shire need to start listening to the people and taking notice of the 8000 plus signatures whilst they still have some credibility left.	The kids and grandkids have great memories of the jetty - sleeping between the rail tracks while we fished. We retired here so the kids could visit from Kalgoorlie but instead they now go to Busselton for their holidays. The jetty should at least stay to the length it is now, so the money should go into lengthening the jetty not many interpretation nodes which will need maintenance.	For fishing, the handrails should be in low maintenance stainless steel, with lower drop down sections for people sitting with rods so they can fish easily with their rod over the lower rail and be comfortable.
Strongly oppose	1. This concept could be of value if there was no jetty to start with; however the length would need to increase to target all the fish that people had access to in the past and require now. 2. We have the bones of a jetty not yet completely destroyed and this can be remediated to a 512 metre length at a considerably lower cost than the real cost of the proposed replacement. This would in addition obviate the necessity of destroying what is left. A total saving of some \$2 million ratepayers dollars is quite conceivable but seemingly of no interest to council. The options therefore are: a) a 400 metre of probably less jetty, unsatisfactory due to insufficient length, or b) a full 525 metre (approx) jetty identical with original, therefore heritage-wise a perfect solution and would be met with heartfelt gratitude and rejoicing by local and goldfields people who have fished it for 80 years	No answer	No answer
Strongly oppose	Because I am as old as the Esperance Tanker Jetty, my wife and I have travelled to visit many historical structures, history should be preserved and with a bit of insight the Jetty can be rebuilt so the tourists can come to Esperance to visit this iconic historical structure that was built in the depression, giving men work for the future of Esperance, a very importance reason why Esperance is a thriving town today.	Too numerous to mention.	Yes, the Esperance Shire Council needs to have foresight to realise no steel and concrete jetty will ever be good enough to replace the Tanker Jetty, its a sad state of affairs that they haven't consulted the community enough to gauge what they want and what is right , nor have they appealed hard enough to the government to acquire funds for the up keep of this important infrastructure. I have also sadly noticed so many homes for sale, clearly something is not working in this town.
Strongly oppose	Existing jetty should have been maintained when local organisations provided support and funding and supported by the district residents.	Wooden, fishable jetty for 840 metres.	original design and concept.
Strongly oppose	I have lived in Esperance since 1948 and think we should repair our lovely old jetty	My dad worked as a wharfie during our younger days	Timber is much nicer than concrete and iron (nothing natural)
Strongly oppose	Started coming to Esperance as a very young child on holidays and have lived here for a long period of time. Always fished during the holidays and have sentimental memories but believe that we need to have a jetty that is open and it is time to move on and build a new one.		
Strongly oppose	Not the same as the original	Walking to the end and back	Make it from wood

Strongly oppose	The Community has not been heard, they want reconstruction of their heritage jetty. If a new petition was done over a couple of weeks there would be many more than 8000 signatures requesting to restore the Jetty. I am disappointed that the Shire has not paid attention to what the people want. Locals have received Independent engineering advice ie Bonacci and Davy, at no cost to the shire. The shire has flatly refused to consider this which would be considerably cost effective. Demolition will destroy sea creatures and marine life under jetty which is pure sacrilege. The short length will reduce the sea depth causing it too shallow for jetty recreation deep fishing.	we need a cast iron figure of what you have in mind. You cannot ask people to decide on a concept when you have not produced figures ie the railing, the lighting, no seating, or shelters over seats, electricity, public art costing! Shire cannot be believed any more we have seen such waste of funds in removing and replacing. look at the James street jetty. misappropriation.	Ridiculous. The concept cannot not be approved without having produced costing within the concept. Shire has continued to pull the wool over the people's eyes. Plain deception. The people want reconstruction of their heritage jetty. They want it at least 520 m long. All I add is that our timber jetty lasted 80 years your H & H concept has guarantee of 40 years. so disappointed that the Shire has not listened to the community and used expertise provided for reconstruction by Ken Davey and save millions of dollars and we will have our jetty sooner. It is criminal to use community money is this way. I hope the Heritage council does not allow his concept to gain ground. There has been no common sense. The Shire has spent \$100s of thousands trying to prove that the Save the jetty people do not know what they are talking about. Outrageous.
Strongly oppose	You are replacing a valued asset for this town. There is not many old wooden jetties left. Concrete is very impersonal and less sustainable.		
Strongly oppose	Please fix our lovely old jetty	Too many to list	
Strongly oppose	I think the jetty should be restored and be the same.	We used to come down from Mt Ida Gold Mines in the north of the goldfields for school holidays every year. All the fun we used to have with all our classmates. We used to come down with all our classmates to The Fresh Air League (now where the backpackers are). We all enjoyed fishing off the jetty. What a shame it has been closed for nearly three years. A neglected heritage asset. Shame on the shire. We have just been on holiday up north along the north coast and all we heard was that they are not coming back to Esperance cause they can't go fishing so they go to jurien bay or busselton where there is a jetty. They all want to know what is wrong with our Shire, and why haven't they fixed it.	It would be more attractive to tourists if it was restored as a heritage structure.
Strongly oppose	Simply because the only option in my opinion is to retain what is still standing and get on with a feasible restoration	I visited Esperance all my childhood years - 1945 - 57. Every summer was spent swimming, fishing and eating the fish. Made friends again with Esperance kids and the dozens of kids from Kalgoorlie every year. As we got older we thoroughly enjoyed fishing at night on the tanker jetty. then as parents we all brought our kids to do the same. That was Esperance. My parents, sister and I lived for those fantastic holidays.	Stop wasting time and money. Just restore the tanker jetty
Strongly oppose	I think it should be Reconstructed as it is Heritage listed	Yes fix it & make it the same length you carnt take 80 years of family history away	just reconstruct our Heritage jetty it will be all still be there it used to work very well

Strongly oppose	Because the jetty is one of three left in our state and taking it away is destroying a big part of the towns history and also of our state of Western Australia. Also it is Heritage Listed and has been totally neglected by the Shire Council for many many years. Travelled to Busselton in Febraury to view what they have done with their jetty and it is an absolute credit to their shire and people. Their whilst a cruise ship was anchored offshore and wonderful to see the ships tenders bring passengers to and from the ship. This could be available to cruise ships that visit Esperance if the grand old jetty is restored. Travelled South Australia on two occasions this year and seen how large and small towns enjoyed the facility of their jetties.		
Strongly oppose	We indicated years ago we don't want a new jetty. Shire knows this. They should be working towards giving us what we want	I don't want any interpretation nodes. I want the real thing	This jetty is not suitable for us. It is a design for a new area. Give us our real jetty.
Strongly oppose	I do not want a replacement jetty. There is no need for one. We can rebuild the one we have, that the shire has neglected for far too long.	This is a horrible joke on the community. We lose a beautiful heritage structure and are given nodes. Just awful	Council needs to reject this design and go back to basics. Do something about the jetty we have
Strongly oppose	To respect and remember our past as we need to understand that, to go into the future.	Do not agree with the concept design	Needs to be the 1934 design 100%
Strongly oppose	I like the tanker jetty as it will be when fixed.	Have lived here for 60 years so many memories, bu they wont b e needed.	The council should stop wasting ratepayers money and fix the tanker jetty.
Strongly oppose	Because it is iconic and historic but know it comes down to money. Port Germein in SA has an old rotting jetty but it is heritage listed and money is available to mend it after storms	No answer	No answer
Strongly oppose	The concept is way too short in length. The concept is hardly any different to the original options presented months ago. It doesn't reflect the heritage of preserving one of the few remaining jetties constructed from timber	All pictures of what used to happen, i.e. ships, trains (history)	Longevity of materials used. James Street jetty is a prime example. Needs to be functional. Needs length to it so as there is sufficient depth to fish in
Strongly oppose	The current jetty is a heritage listed timber jetty. This is a concrete and steel jetty. While it's better than no jetty I'd prefer a timber jetty.	No	Just renovate the old jetty. Concrete and steel won't last for 80 years.
Strongly oppose	A replacement jetty that retains so little of the historical fabric of the Tanker Jetty should be scrapped. It is our responsibility to retain high quality historic landmarks in our generation and a reconstruction is the only decision. Esperance was built on port trade and this jetty is a symbol of our history and should so for hundreds of years to come.	Scrap this design	A 50 year design of steel piles and concrete has no place in our town.
Strongly oppose	We should retain our historic jetty as much as possible	do not approve design	N/A
Strongly oppose	I want it RESTORED.	These are pathetic and unconvincing. Get serious about history.	Restore it instead.
Strongly oppose	There is only one answer and that is a complete refurbish and then follow Busselton's concept and bring the financial returns. I for one would be willing to pay a rate levy to contribute.		
Strongly oppose	The jetty should be maintained in the original style it was build it. It is an iconic structure and is heritage listed. The jetty has lasted over 80 years. The new one has hardly any heritage features, concrete and steel expected to last fifty years. You have no costings for this jetty and Heritage Council would prefer to have the reconstruction. People travel overseas to view historical buildings, castles, piers, etc and there is very little historical building's remaining in Esperance.		
Strongly oppose		going squidding	leaving it
Strongly oppose		No	That I don't want anymore of my rates spent on this.
Strongly oppose	The concept is not long enough. I have zero trust in this council keeping its promises.	None that i wish to share with this council.	
Strongly oppose	Love the Esperance Tanker Jetty, the fishing is awesome, my family always looked forward to spending our holidays on the fantastic curved wooden jetty	Many memories, however I want my kids to make memories fishing off the Tanker Jetty again, please make this happen!	Fix the historic jetty like they do in South Australia

Strongly oppose	The existing jetty should be restored.The unique marine life is reason enough to do this,this marine life will be destroyed if the old jetty is removed.The old jetty is also historical.The Jetty can be restored,it has been done elsewhere.I think the shire are letting down the entire community,visitors who have enjoyed the jetty over the years,and the marine life	Fishing with my dad when I was a kid Walking along the jetty and enjoying the sea	The council needs to scrap this design altogether and focus on what the community actually wants,which is restoration of the old jetty.Isnt it the councils job to listen to the people?
Strongly oppose	We are having the wool pulled over our eyes with this plan. It is too short It is concrete and steel it is not OUR jetty Once this one is pulled down we have lost it forever Why wasn't this one repaired earlier why should the council get their plan when they deliberately let our jetty fall into disrepair Do you want me to keep going?	My memories cannot be showcased in interpretation nodes	Do not approve the design. The original jetty is beautiful. This one is a farce
Strongly oppose	We don't need a replacement jetty, we need our timber jetty rebuilt	What a joke!	Do what the community wants and give us back our jetty, not this piece of junk
Strongly oppose	because it looks weird	yes feeding the seal	make it pretty
Strongly oppose	Shiny and new is NOT better than a restoration of a valuable part of our town!	What is an 'interpretation node'?	Protect the wildlife underneath!!
Strongly oppose	Restore the one we already have.		
Strongly oppose	I think for heritage value and the endangered sea dragons and jetty dive sights that the original jetty should be saved and not demolished	The old jetty had been there for 80 years and millions of dollars raised by the community to keep it maintained was totally ignored by the shire and the shire wasted so much money on studies and reports which should have been spent on maintaining the original heritage listed jetty	Listen to the people not plan their own agenda, if it is demolished it won't be a heritage jetty anymore.
Strongly oppose	You need to repair the old Jerry. Shame on you.	Wow, what do you actually care? The people have spoken and we don't want a new jetty. fix the heritage jetty.	The people of Esperance not the council.
Strongly oppose	The draft concept does not replicate the existing Tanker Jetty, except for a small section (Historic) which disrespectfully uses new timber instead of recycled timber (except for a few inlays). The draft concept report states in two instances the timber to be used has an expected life-span of 25 years. What sort of timber is being used? Balsa wood? How old is the timber on the Tanker Jetty? So, extra maintenance costs for the Shire and the community. The proposal is not long enough, which will lead to over-crowding. But most importantly, the concept structure has virtually no historic or heritage components. Locals and visitors don't see the Tanker Jetty as a fishing platform -- they see it as a unique, heritage-listed jetty which should be reconstructed. What the draft concept offers is just a concrete and steel pier.	Because I am totally opposed to the concept, which includes the 'interpretation nodes', I have no response to this question.	I think Council needs to consider reconstruction of the Tanker Jetty.
Strongly oppose	As i feel that this is departing from what the original jetty looks like . im sure reconztruction of original would be a better option	none really only that my dad introduced me to the jettys in esperance when i was only 3years of age when there was the old and new jetty	
Strongly oppose	How could anybody possibly support this substitute for the real thing?	No thank you. If you are stupid enough to think memories can be encapsulated in nodes, you are worse than I thought you are.	Council needs to consider the community. We have been telling you for years that we want our jetty. Had you spent money on repairs we could still have our jetty to walk on and fish from.
Strongly oppose	This is not what we want. We want our real jetty, not this artificial one	My disgust at the council. People of the town donated money to save the jetty. The council is now using it to pull the jetty down. Display how disgusting you are.	You need to consider what the people of this town want. You have delayed and delayed in the hope that people will say "any jetty, just build it." Well, you are wrong. We want to save the jetty, not destroy it.
Strongly oppose	The community has never been given a chance to really have its say. This is not what we want.	What is the point? Interpretation nodes are useless	Council needs to consider that the community wants its own jetty not this artificial thing
Strongly oppose	It isn't made of wood like the original	The wooden jetty	Not cement and steel
Strongly oppose	If jetty is replaces, marine life that has already set up home there will most likely not survive		

Strongly oppose	will never be built , there is no funding its simply a way of removing heritage jetty	Many such as fishing and walking ,all which will not possible wit removal of old jetty	REPAIR current jetty
Strongly oppose	this jetty design has NO heritage and will never be built	None it wont be built	repair existing jetty
Strongly oppose	With all the \$\$\$ wasted already, this could be used on the repair of the existing jetty!	Too many to list!!!	Talk to the PEOPLE of esperance.. AND ACTUALLY LISTEN! I'd suggest NEW Councillors, that will do this.
Strongly oppose	It should be at least as long as it is now and should be timber, not steel and concrete	You can't showcase my memories. They are part of the heritage value of this spectacular structure	Definitely reject the plan.
Strongly oppose	Would prefer to see the Tanker Jetty reconstructed because of its rich heritage which is very important to the town of Esperance	Every resident of Esperance has strong memories regarding our iconic Tanker Jetty and also is a drawcard to the tourists	The only thing Council needs to consider is to reconstruct our iconic Tanker Jetty
Strongly oppose	no heritage value at all	many , the best way to keep the memories is to restore the existing one	Restore existing Jetty
Strongly oppose	The jetty should have been looked after and maintained right from the beginning		
Strongly oppose	The jetty should be an exact replica of the original design not someones futuristic brain fart		Just build it to the original jetty design, the original jetty was iconic and provided easy access for fishing, diving and swimming. Why complicate the rebuild with crappy concept designs that have no place in Esperance
Strongly oppose	This is not what the community wants	What a load of rubbish. As if my memories could be captured in a node	Council should scrap the design and the whole idea of a new jetty and give us our jetty back
Strongly oppose	The jetty is of heritage value and should be rebuilt as it was.		
Strongly oppose	Wooden jetties have a wonderful place in our history. Esperance old tanker jetty should be preserved for future generations. It has been sadly neglected and not been maintained. It can be restored/reconstructed. I don't want the new jetty!	The holds many memories for our family as it does for many other families.	
Strongly oppose		No
