

# Fire Break Contractor List

July 2017

## Fire breaks are the responsibility of all land owners

On private property, fire breaks provide a strategic line of defence for fire fighters and aid in slowing the rate of spread of bush fires. In the interest of safety for landowners, your neighbours and wider community, fire breaks need to be installed by 1<sup>st</sup> October annually.

Provided below is a list of local contractors who are able to assist in fire break installation and maintenance. The Shire of Esperance strongly encourages private landowners to make a standard work order with contractors, whereby the work is automatically undertaken by prior arrangement on an annual basis.

## Clearing and Slashing
